

LIST OF TABLES

<u>Table No.</u>		<u>Page</u>
3.1	Reliability coefficients for six values of 'study of values' using Spearman-Brown Formula	126
3.2	Province-wise, school-wise composition of Ethiopian and Indian teacher samples	141
3.3	Composition of Ethiopian and Indian sample with respect to selected demographic and professional variables.	143
4.1	The significance of difference between means for six values between Ethiopian and Indian teachers	158
4.2	Composition of value mean scores of Ethiopian and Indian teacher groups with U.S. norm teacher group	159
4.3	Value hierarchy of Ethiopian and Indian teachers	161
4.4	Significance of difference between means for six values of Ethiopian and Indian lower age teacher groups	188
4.5	Value hierarchy of Ethiopian and Indian lower age teacher groups	189
4.6	Significance of difference between means for six values of Ethiopian and Indian upper age groups	190
4.7	Value hierarchy of Ethiopian and Indian upper age teacher groups	191
4.8	Significance of difference between means for six values of lower age and upper age teacher groups of Ethiopian sample and Indian sample	193
4.9	Summary of value comparisons with respect to the variable age	195

<u>Table No.</u>		<u>Page</u>
4.9a	Significance of difference between means for six values of Ethiopian and Indian male teachers	201
4.10	Value hierarchy of Ethiopian and Indian male teacher groups	202
4.11	Significance of difference between means for six values of Ethiopian and Indian female teachers	203
4.12	Value hierarchy of Ethiopian and Indian female teacher groups.	204
4.13	Significance of difference between means for six values of male and female teacher groups of Ethiopian and Indian samples	206
4.14	Summary of value comparisons with respect to the variable sex	208
4.16	Significance of difference between means for six values of Ethiopian and Indian untrained teachers	216
4.17	Value hierarchy of Ethiopian and Indian unmarried teachers	217
4.18	Significance of difference between means for six values of the Ethiopian and Indian married teachers	219
4.19	Value hierarchy of Ethiopian and Indian married teachers	220
4.20	Significance of difference between means for six values of married and unmarried teacher groups of Ethiopian and Indian samples	222
4.21	Summary of value comparison with respect to the variable marital status	224

<u>Table No.</u>		<u>Page</u>
4.22	Significance of difference between means for six values of Ethiopian and Indian teachers working in urban schools	229
4.23	Value hierarchy of Ethiopian and Indian urban (school) teachers	230
4.24	Significance of difference between means for six values of Ethiopian and Indian teachers working in rural schools	232
4.25	Value hierarchy of Ethiopian and Indian teachers from rural schools	233
4.26	Significance of differences between means for six values of rural and urban teachers of the Ethiopian and Indian samples	235
4.27	Summary of value comparisons with respect to rural urban location of schools	236
4.28	Significance of difference between means for six values of Ethiopian and Indian Christian teachers	242
4.29	Value hierarchy of Ethiopian and Indian Christian teacher groups	243
4.30	Significance of difference between means for six values of Ethiopian Christian and Indian Hindu teachers	245
4.31	Value hierarchy of Ethiopian Christian teacher group and Indian Hindu teacher group	246
4.32	Significance of differences between means for six values of Christian and Muslim Ethiopian teachers and Hindu and Christian Indian teachers	247
4.33	Summary of value comparisons with respect to the variable religion	249

<u>Table No.</u>	<u>Page</u>	
4.34	Significance of difference between means for six values of Ethiopian and Indian science teachers	254
4.35	Value hierarchy of Ethiopian and Indian science teachers	255
4.36	Significance of difference between means for six values Ethiopian and Indian Arts teachers	257
4.37	Value hierarchy of Ethiopian and Indian Arts teachers	258
4.38	Significance of difference between means for six values of science and Arts teachers in Ethiopian and Indian samples	260
4.39	Summary of value comparisons with respect to the subject teaching	261
4.40	Significance of difference between means for six values of Ethiopian and Indian low experienced teacher groups	266
4.41	Value hierarchy of Ethiopian and Indian low experienced teacher groups	268
4.42	Significance of difference between means for six values of Ethiopian and Indian middle experienced teacher groups	269
4.43	Value hierarchy of Ethiopian and Indian middle experienced teacher groups	270
4.44	Significance of difference between Indian means for six value of Ethiopian and Indian high experienced teacher groups	271
4.45	Value hierarchy of the Ethiopian and Indian high experienced groups	272

<u>Table No.</u>	<u>Page</u>	
4.46	Significance of mean differences between low and middle, low and high, and middle and high experienced teacher groups in Ethiopian and Indian samples	275
4.47	Summary of value comparisons with respect to the variable teaching experience	277
4.48	Significance of difference between means for six values of Indian teacher group with respect to qualifications	281
4.49	Significance of difference between means for six values of Ethiopian teacher group with respect to their qualification	283
4.50	Correlational matrix for age and six values of Ethiopian and Indian teachers	288
5.1	significance of difference between means for MTAI scores of Ethiopian and expatriate Indian Teachers	297
5.2	Cross cultural comparison of differences between mean MTAI scores by sex	298
5.3	Cross cultural comparison of differences in mean MTAI scores of teachers with respect to age	299
5.4	Cross cultural comparison of differences in mean MTAI scores of teachers with respect to marital status	300
5.5	Cross cultural comparison of differences in mean MTAI scores of teachers with respect to the location of their schools	301
5.6	Cross cultural comparison of difference in mean MTAI scores of teachers with respect to their religion	302

<u>Table No.</u>	<u>Page</u>	
5.7	Cross cultural comparison of difference in mean MTAI scores of teachers with respect to subject teaching	303
5.8	Cross cultural comparison of difference in mean MTAI scores of teachers with respect to teaching experience	304
5.9	Cross cultural comparison of differences in mean MTAI scores of teachers with respect to their qualification	307
5.10	Correlations between MTAI scores and six value scores for Ethiopian and Indian teachers	309
6.1	Reasons for taking up employment in Ethiopia	341
6.2	Willingness to go back to India if salary conditions are the same in both the countries	342
6.3	Willingness to accept a job in any other country if better salary was offered than that of the present	343
6.4	Teachers' interest in economic gain versus their interest in teaching profession	344
6.5	Teachers' perception of their effectiveness in the profession	345
6.6	Students' acceptance of teachers as perceived by teachers	346
6.7	Perceptions of teachers of their dealing with students	347
6.8	Student characteristics as perceived by teachers	348
6.9	Appreciation by authorities as perceived by teachers	349
6.10	Disposition of teachers towards working in rural areas	350

<u>Table No.</u>		<u>Page</u>
6.11	Disposition of Ethiopians towards Indians as a teacher group	351
6.12	Disposition of teachers towards Indian settlement in Ethiopia	352
6.13	Qualities of Indian and Ethiopian teachers as perceived by each other	353
6.14	Adjustment with Indians as perceived by Ethiopians	354
6.15	Tendency among Ethiopian and Indian teachers to keep a distance from each other	355
6.16	Willingness to share living quarters with the other	356
6.17	Indians adjustment with local life as perceived by the teachers	357
6.18	Indian teachers staying with families in Ethiopia	358
6.19	Cross national participation in cultural programmes	359
6.20	Indian teachers' participation in Ethiopian organisations and clubs, as perceived by teachers	360
6.21	Inter cultural participation of women folk in parties, as perceived by teachers	361
6.22	Inter cultural participation of women folk in dance, as perceived by teachers	362
6.23	Difference in morality as perceived by teachers	363
6.24	Teachers' views on marriage	364
6.25	Teachers about marriage of Ethiopian and Indian teachers	365

<u>Table No.</u>		<u>Page</u>
6.26	Visiting bars as perceived by teachers	366
6.27	Reasons mentioned by teachers for abstaining from bars	367
6.28	Indian teachers speaking Ethiopian languages	368
6.29	Food habits of Indian teachers	369
6.30	Preference of dress among teachers	370
6.31	Disposition of Indian teachers toward educating their children in Ethiopia	371
6.32	Attachment of Indians to their own country	372
6.33	Visiting colleagues of own nationality	373
6.34	Visiting colleagues of other nationality	374
6.35	Inter group invitations to visit homes	375
6.36	Teachers celebrating their national and religious festivals	376
6.37	Inviting teachers of other nationality during festivals	377
6.38	Tendency to arrange get togethers among teachers groups	378
6.39	Intergroup invitations to participate in parties	379
6.40	Teachers who take part in tours or picnics	380
6.41	Inter group involvement in tours or picnics	381
