

LIST OF TABLES

<u>TABLE NO.</u>		<u>PAGE</u>
3.1	The Number of Items included in the Pilot Draft of the Tool	126
3.2	Range of the 't' values	153
3.3	Number of Items in Each Section in the Attitude Scale	156
3.4	Personal data regarding the respondents	164
4.1	Significant difference between the regions with all the components of non-formal education	170
4.2	Significant difference between urban and semi-urban with all the components of NFE (GT) (Grand Total)	174
4.3	Significant difference between age-groups with the component. (Grand Total)	176
4.4	Significant difference between male and female with the component (Grand Total)	178
4.5	Significant difference between below 5 years' and above 5 years' teaching experience with the components (Grand Total)	179
4.6	Significant difference between visit to foreign and non-visit with the component: Grand Total	181
4.7	Significant difference between the attitude of teacher educators of the different regions towards the components of general aspects	186
4.8	Significant difference between the attitude of Teacher-educators of different regions with the components of need and importance.	

<u>TABLE NO.</u>		<u>PAGE</u>
4.9	Significant difference between the attitude of teacher-educators of different regions with the components of aims and objectives of the programmes of non-formal education leading to life-long education	194
4.10	Significant difference between the attitude of Teacher-educators of different regions with the components of non-formal education programmes leading to life-long education	199
4.11	Significant difference between the attitude of Teacher-educators of different regions with the components of Organisational Aspects.	205
4.12	Significant difference between the attitude of teacher-educators of different regions with the component suggestion	211
4.13	Significant difference between the attitude of urban and semi-urban teacher-educators towards the components of General aspect	215
4.14	Significant difference between the attitude of teacher-educators of urban and semi-urban areas with the components of need and importance	218
4.15	Significant difference between the attitude of teacher-educators of Urban and Semi-Urban areas towards the component Aims and Objectives	221
4.16	Significant difference between the attitude of teacher-educators of urban and semi-urban area towards the components of the programmes of non-formal education.	224

<u>TABLE NO.</u>		<u>PAGE</u>
4.17	Significant difference between the attitude of teacher-educators of the urban and semi-urban areas towards the components of organisational aspects of the programmes of non-formal education	226
4.18	Significant difference between the attitude of teacher-educators of urban and semi-urban areas towards the component suggestions	229
4.19	Significant difference between the attitude of male teacher-educators and that of the female teacher-educators towards the components of General Aspects	232
4.20	Significant difference between the attitude of teacher-educators of the various age-groups towards the components of General Aspect	235
4.21	Significant difference between the attitude of teacher-educators having less than five years' experience and those of having more than five years' experience towards the components of General Aspect	238
4.22	Significant difference between the attitude of teacher-educators having their visit to a foreign country and those of having not their visit to a foreign country towards the components of General Aspect	240
4.23	Significant difference between the attitude of Male teacher educators and those of the female teacher-educators towards the components of Need & Importance	242

<u>TABLE NO.</u>		<u>PAGE</u>
4.24	Significant difference between the age-groups with the components Need & Importance	244
4.25	Significant difference between the attitude of teacher-educators having less than five years' teaching experience and those of having more than five years' teaching experience towards the components of Need & Importance	247
4.26	Significant difference between the attitude of Teacher-Educators having their visit to a foreign country and those of having not their visit to a foreign country towards the components of Need and Importance	248
4.27	Significant difference between the attitude of the male and female teacher-educators towards the component of aims and objectives	251
4.28	Significant difference between the attitude of teacher-educators of the various age-groups towards the components of aims and objectives of non-formal education programmes	252
4.29	Significant difference between the attitude of teacher-educators having less than five years' experience and those of having more than five years' teaching experience towards the component of aims and objectives	254
4.30	Significant difference between the attitude of teacher-educators having their visit to a foreign country and those of having their not visit to a foreign country towards the components of aims and objectives	256

<u>TABLE NO.</u>	<u>PAGE</u>
4.31 Significant difference between the attitude of male teacher-educators and those of the female teacher-educators towards the dimensions of non-formal education programmes	258
4.32 Significant difference between the attitude of teacher-educators of the different age groups towards the dimensions of non-formal education programmes	261
4.33 Significant difference between the attitude of teacher-educators having less than five years' teaching experience and those of having more than five years' teaching experience towards the dimensions of non-formal education programmes.	264
4.34 Significant difference between the attitude of teacher-educators having their visit to a foreign country and those of having not their visit to a foreign country towards the dimensions of non-formal education programmes.	266
4.35 Significant difference between the attitude of male teacher-educators and female teacher-educators towards the dimensions of organizational aspects of non-formal education programmes.	270
4.36 Significant difference between the attitude of teacher-educators of the various age-groups towards the components of Organisational aspects of non-formal education programmes.	271
4.37 Significant difference between the attitude of teacher-educators having less than five years' teaching experience and above five years' teaching experience towards the dimensions of organizational aspects of non-formal education programmes	274

<u>TABLE NO.</u>	<u>PAGE</u>
4.38 Significant difference between the attitude of teacher-educators having their visit to a foreign country and those of having not their visit to a foreign country towards the dimension of non-formal education programmes.	277
4.39 Significant difference between the attitude of male teacher-educators and the female teacher-educators towards the component suggestions.	279
4.40 Significant difference between the attitude of teacher-educators of the various age-groups towards the component suggestion	281
4.41 Significant difference between the attitude of teacher-educators having less than five years' teaching experience and those of having more than five years' teaching experience towards the component suggestion	283
4.42 Significant difference between the attitude of teacher-educators having their visit to a foreign country and those of having not their visit to a foreign country towards the component suggestion	285
4.43 Correlation Matrix	287

LIST OF CHARTS

<u>Chart No.</u>		<u>After Page No.</u>
