

LIST OF TABLES

TABLE NO.	PAGE
1.1 : Principles of programmed learning and their applications in the seven forms of programme ..	27
1.2 : Comparative analysis of the seven treatments ..	37
2.1 : Analysis of the outcomes of comparative studies..	79
3.1 : Contentwise analysis of criterion test..	.. 104
3.2 : Types of frames used in the seven programme forms	.. 107
3.3 : Nature of 'Exercises' or criterion frames	.. 110
3.4.: Table showing the distribution of scores on the tryout N=20 for each form	.. 124
3.5 : Preparation of programme forms	.. 126
3.6 : Table showing the final sample used in the statistical analysis	.. 130
4.1 : Distribution of scores of the seven treatment groups on the immediate posttest (N=46)	.. 132
4.2 : Distribution of scores of the seven treatment groups on the Retention test	.. 139
4.3.: Frequency distribution of the seven treatment groups in terms of the time taken to finish (Time in mts.)	.. 140
4.4 : Means scores of the seven treatment groups on immediate posttest, retention test, percentage of retention and time	.. 141
4.5 : Totals and means on initial scores (intelligence)	144
4.6 : Computation of sum of scores for classes for the initial scores (Intelligence)	.. 146
4.7 : Totals and means on final scores (immediate posttest scores)	.. 148
4.8 : Computation of sum of squares for classes for the final scores (Immediate posttest scores)	.. 149A
4.9 : Analysis of covariance of the immediate posttest scores for the seven treatment groups (taking intelligence as the initial scores)	.. 156
4.10: Significance of difference between means of any two treatments on the immediate posttest (Using the technique of L.S.D.)	.. 159

List of Tables

TABLE NO.	PAGE
4.11 : Totals and means on final scores - percentage of retention	.. 161
4.12 : Computations of sum of squares for classes for the final scores percentages of retention	.. 163
4.13 : Analysis of covariance of the percentage of retention scores for the seven treatment groups (Taking intelligence as the initial score)	.. 170
4.14 : Significance of difference between means of any two treatments on the percentage of retention (Using the technique of L.S.D.)	.. 172
4.15 : Totals and means on final scores - Time taken to finish the programme	.. 174
4.16 : Computation of sum of squares for classes for final scores (Time taken to finish the programme)	.. 176
4.17 : Analysis of covariance of the time (in minutes) required by the seven treatment groups to finish the programme (taking intelligence as the initial score)	.. 183
4.18 : Significance of difference between means of any two treatments on the time taken to finish the programme (Using the technique of L.S.D.)	.. 185
4.19 : Table showing the results of different statistical analysis on the three criteria of effectiveness	.. 187
5.1 : The relative effectiveness of the seven treatments on the immediate posttest, percentage of retention and the time taken to finish the programme	.. 195
