

### ACKNOWLEDGMENTS

My very real and sincere debt of gratitude is due to the Principals of all the Training Colleges for giving me all the facilities for testing the trainees in their Colleges. But for their active cooperation this work could not have seen the light of the day.

I express my thanks to all the staff-members in those Colleges also, who actively helped me in administering the test.

I also extend my thanks to the Registrars of various universities who helped me a lot in my work by supplying to me the examination marks obtained by the candidates.

I am highly indebted to a number of friends in different Training Colleges, inspectors of secondary schools and the Principals of the secondary schools for helping me in my work in one way or the other.

I would feel myself ungrateful if I, at this juncture, were to forget to mention my debt to Prof. T. K. N. Menon, the retired Dean, Prof. S. N. Mukerji, the present Dean and Dr. M. S. Patel, Professor of Education and Linguistics, all of the Faculty of Education and Psychology, Baroda. They all took very active interest in my work and helped me by rendering all the facilities to carry out and complete the work.

Shri D. G. Apte and Dr. S.M. Divekar, my, one time,

revered teachers and at present seniormost colleagues showed a great interest in my work. Their constant encouragement, helped me to a great deal in completing successfully this arduous task. I am very much thankful to both of them.

I am also indebted to Shri S. J. Trivedi of the "Examination Reform Centre", and Shri S. C. Jaiswal of the "Statistical Service Unit", both of M.S.University of Baroda, Baroda. Their suggestions for statistical computations were of immense help to me.

I am very much indebted to Shri R. M. Dalal and Dr. S. G. Kantawala for their active interest in going through the entire manuscript. Their searching scrutiny resulted in avoiding typing and language mistakes.

I was lucky to have the proud privilege of working under Prof. T. P. Lele as his first Ph. D. student. Prof. Lele is one of the very few educationists working in the field of 'Mental Testing'. I was initiated in educational research techniques by him when I constructed under his guidance a "Diagnostic Test in Basic Arithmetic Skills" for my M.Ed. dissertation. It was he who inspired me to take up this second major research for my doctorate thesis. Prof. Lele's marvellous insight in, and perfect mastery over the subject and his prompt willingness to help me by taking very active interest in guiding me at each stage of my work have made it possible for me to present this work. Prof. Lele's crystal clear heart

iii

and extremely high moral character have made everlasting impression on me. Last but not least, I take this opportunity to express my deep sense of gratitude to him by avowing to carry on the much needed research work in educational field which is so dear to him.

Faculty of Education & Psychology,  
Baroda, 10th July, 1961.
