

List of Tables

1 Position of Secondary Education in India from 1950-51 to 1957-58..... 9

2 Showing the relation of the coefficient of Correlation (R) to the per cent of Forecasting Efficiency (E)..... 46

3 Showing individuals for selecting criterion groups, and their internal and university marks along with the groups to which they are placed.....134

4 Data grouped for the calculation of mean, median and standard deviation of the internal marks of 100 individuals.....139

5 Data grouped for the calculation of mean, median and standard deviation of the university marks of 100 individuals.....140

6 Scatter Diagram between internal marks and university marks.....142

7 Principals' estimation of the trained teachers.....145

8 Scatter Diagram between university marks and principals' estimation..... 147

9 Showing the values of R_h , R_l , R_t , Chi, etc..... 158

10 Showing number of valid items in the different sub-tests..... 167

11 Showing internal consistency data, 'internal consistency indices' and 'difficulty values' of the items..... 192

12 Analysis of the non-discriminating distractors. 201

13 Distribution of items according to 'D' values.. 207

14 Showing distribution of items among sub-tests selected for final test..... 211

15 Showing the new order of the sub-tests in the final test.....212

- 16 Showing the corresponding serial numbers of items in pilot and final tests..... 214
- 17 Showing different types of test-data..... 240
- 18 Data grouped for the calculation of mean, median and standard deviation of the aptitude scores of 530 trainees..... 242
- 19 Showing scores achieved by 530 trainees on 'Attitude towards Children', Sub-test, I..... 246
- 20 Showing scores achieved by 530 trainees on 'Mental Ability' - Sub-test, II..... 247
- 21 Showing scores achieved by 530 trainees on 'Interest in Profession' - sub-test, III..... 247
- 22 Showing scores achieved by 530 trainees on 'Adaptability' - sub-test, IV..... 248
- 23 Showing scores achieved by 530 trainees on 'Professional Information' - sub-test, V..... 248
- 24 Showing how each testing centre (sub-group sample) is designated..... 249
- 25 Showing results of the statistical analysis of the 'Aptitude Test score' - data obtained from the total sample and sub-group samples..... 250
- 26 Showing results of the statistical analysis of the scores on 'Attitude towards children' - sub-test, I - data obtained from the total sample and sub-group samples..... 251
- 27 Showing results of the statistical analysis of the scores on 'Mental Ability' - sub-test, II - data obtained from the total sample and sub-group samples..... 252
- 28 Showing results of the statistical analysis of the scores on 'Interest in Profession' - Sub-test, III - data obtained from the total sample and sub-group samples..... 253
- 29 Showing results of the statistical analysis of the scores on 'Adaptability' - sub-test, -IV - data obtained from the

	total sample and sub-group samples.....	254
30	Showing results of the statistical analysis of the scores on 'Professional Information' - sub-test, V - data obtained from the total sample and sub-group samples....	255
31	Showing the values obtained of skewness, kurtosis, etc. of score distribution on aptitude test (whole test) and on each sub-test - data obtained from total sample.....	263
32	A Chi-square Test of the 'Normal-Distribution Hypothesis' applied to a frequency distribution of aptitude test scores.....	267
33	A Chi-square Test of the 'Normal-Distribution Hypothesis' applied to a frequency distribution of sub-test, I - test score.....	268
34	A Chi-square Test of the 'Normal-Distribution Hypothesis' applied to a frequency distribution of sub-test, II - test scores.....	269
35	A Chi-square Test of the 'Normal-Distribution Hypothesis' applied to a frequency distribution of sub-test, III - test scores.....	270
36	A Chi-square Test of the 'Normal-Distribution Hypothesis' applied to a frequency distribution of sub-test, IV - test scores.....	271
37	A Chi-square Test of the 'Normal-Distribution Hypothesis' applied to a frequency distribution of sub-test, V - test scores.....	272
38	Showing smoothed frequencies.....	276
39	Showing Normal curve ordinates for total test score data.....	281
40	Showing Normal curve ordinates for sub-test, I score data.....	283
41	Showing Normal curve ordinates for sub-test, II score data.....	283

- 42 Showing Normal curve ordinates for sub-test,
III score data.....284
- 43 Showing Normal curve ordinates for sub-test,
IV score data.....284
- 44 Showing Normal curve ordinates for sub-test,
V score data.....285
- 45 Showing the comparison of results obtained
from the study of the nature of curves
obtained by three different techniques...291
- 46 Showing types of reliability coefficients and
methods to estimate them.....300
- 47 Data grouped for the calculation of mean,
median and standard deviation of the
distribution of the 'reliability sample'..307
- 48 Showing the scattergram of scores used in
'split-half' method.....308
- 49 A specimen of 'student-item' chart.....311
- 50 An analysis-of-variance table.....313
- 51 Showing 'pq' values of 120 test-items.....317
- 52 Showing the reliability coefficient of the
present test as obtained by different
methods.....320
- 53 Sources of variation represented in different
procedures for estimating reliability.....321
- 54 Showing the reliability coefficient of each
sub-test along with its probable error
and the index of reliability.....326
- 55 Showing reliability coefficients of correlation
along with their probable errors and
indices of reliability for the whole test
with respect to each unit sample.....327
- 56 Showing a scatter-diagram between the criterion
and the test-scores.....341
- 57 Showing a scatter-diagram between Part-I scores
and test-scores.....343
- 58 Showing a scatter-diagram between Part-II scores
and test-scores.....344

59	Validity coefficients between criterion scores and test scores.....	342
60	Coefficients of correlation between criterion score and each of the sub-tests score.....	345
61	Correlations of Judgments of Teaching Success with various Tests.....	348
62	Unit A - Coefficients of Correlation.....	352
63	Unit B - Coefficients of Correlation.....	352
64	Unit C - Coefficients of Correlation.....	352
65	Unit D - Coefficients of Correlation.....	353
66	Unit E - Coefficients of Correlation.....	353
67	Unit F - Coefficients of Correlation.....	353
68	Inter-correlations of five tests and a criterion.....	365
69	Values of 'V' for different tests.....	366
70	Values of 'Z' for different tests.....	366
71	Showing values of "Shrunken" multiple coefficient of correlation for each test and also showing whether the test is retained.....	368
72	A work sheet prepared to aid in the selection of tests to be added to test-battery...	369
73	'C' - entries for the four selected tests and for the criterion.....	370
74	Mean and standard deviation of the criterion.	372
75	Means and standard deviations of tests, calculated from raw scores.....	372
76	Intercorrelations of five tests, illustrating the condition of simple proportionality in a Correlation Matrix.....	388
77	Extraction of the first centroid factor from the correlation matrix.....	389
78	First Factor Matrix.....	390

79	First Residual-correlation Matrix.....	391
80	Extraction of the second centroid factor from the first residual correlation matrix in which variables I, III & IV are reflected.....	393
81	Intercorrelations of five tests, illustrating the condition of simple proportiona- lity in a Correlation Matrix - Unit A - sample.....	395
82	Intercorrelations of five tests, illustrating the condition of simple proportiona- lity in a correlation Matrix - Unit B - sample.....	396
83	Intercorrelations of five tests, illustrating the condition of simple proportiona- lity in a correlation Matrix - Unit C - sample.....	396
84	Intercorrelations of five tests, illustrating the condition of simple proportiona- lity in a correlation Matrix - Unit D - sample.....	397
85	Intercorrelations of five tests, illustrating the condition of simple proportiona- lity in a correlation Matrix - Unit E - sample.....	397
86	Intercorrelations of five tests, illustrating the condition of simple proportiona- lity in a correlation Matrix - Unit F - sample.....	398
87	Schematic presentation of the main types of norms.....	403
88	Raw scores and their corresponding standard scores and T-scores.....	408
89	Percentile norms.....	415
90	Percentile Ranks.....	418
91	Cumulative and Cumulative per cent frequencies.....	424
92	Assigning letter grades to scores.....	425
93	Sub-test, III correlated with the remaining tests.....	437

94	Classification of testees according to letter grades.....	440
