Declaration		I
Acknowledgements		II
Abbreviations		V
Summary		i-xi
Chapter-1	Introduction to chromene derivatives and their applications	1-23
	1.1 Coumarin	1
	1.2 Flavone	5
	1.3 Cancer	9
	1.4 Diabetes	11
	1.5 Liquid Crystals	13
Chapter-2	Synthesis and applications of 3,7-disubstituted chromen-2-one derivatives as anticancer agent	24-67
	2.1 Introduction	24
	2.2 Results and Discussion	
	2.2.1 Chemistry	26
	2.2.2 Biological evaluation	53
	2.3 Conclusion	58
	2.4 Experimental	59
	2.5 References	67
Chapter-3		
Chapter-3a	Synthesis of proline-sulphonamide derivatives of chromen-2-ones as anticancer and antidiabetic agents	68-119
	3a.1 Introduction	68
	3a.2 Results and Discussion	
	3a.2.1 Chemistry	69
	3a.2.2 Biological evaluation	103
	3a.3 Conclusion	106
	3a.4 Experimental	107
	3a.5 References	117
Chapter-3b	Synthesis and Cytotoxic studies of Chalcone derivatives of chromen-2-ones and 3-Aminomethyl pyridine	120-168
	3b.1 Introduction	120
	3b.2 Results and Discussion	
	3b.2.1 Chemistry	121
	3b.2.2 Biological evaluation	151
	3b.3 Conclusion	158
	3b.4 Experimental	159
	3b.5 References	167

Chapter-4		
Chapter-4a	Synthesis of chalcone derivatives of chromen-2-ones with mesogenic properties	169-207
	4a.1 Introduction	169
	4a.2 Result and Discussion	
	4a.2.1 Chemistry	170
	4a.2.2 Studies for liquid mesogenic properties	193
	4a.3 Conclusion	199
	4a.4 Experimental	200
	4a.5 References	206
Chapter-4b	Synthesis of Schiff base derivatives of chromen-2-ones with mesogenic properties	208-238
	4b.1 Introduction	208
	4b.2 Result and Discussion	
	4a.2.1 Chemistry	208
	4a.2.2 Studies for mesogenic properties	226
	4b.3 Conclusion	232
	4b.4 Experimental	233
	4b.5 References	238
Chapter-5	Synthesis of chromen-4-one and bis-chromen-4-one derivatives and its applications	239-271
	5.1 Introduction	239
	5.2 Result and Discussion	
	5.2.1 Chemistry	240
	5.2.2 Studies for mesogenic properties	263
	5.3 Conclusion	264
	5.4 Experimental	265
	5.5 References	271
