

Although writing up the PhD thesis might be the effort of one person, the reason that person even gets as far as starting to write up is thanks to all the people supporting that PhD student. First and foremost, I would like to extend my sincere gratitude to my research guide Prof. (Dr.) Anjali Patel for introducing me to this exciting field of catalysis and for facilitating all the requirements for research, going out of her way. Despite holding on to innumerable other responsibilities as the Head of Department, she always had time for my queries and made it a point to solve them to the best of her abilities. Her advice during my doctoral research endeavours for the past five years has constantly forced me to remain focused on achieving my goal. Her enthusiasm, integral view on research and her mission for providing high-quality work, has made a deep impression on me. Without her guidance and constant feedback this PhD would not have been achievable. Her technical and editorial advice as well as insights on the workings of academic research in general was essential for completion of this thesis work. Her unflinching courage and conviction will always inspire me. Most importantly, her mentorship has ensured my all-round development as a person, and helped me become a better human being, for which, I will be eternally grateful.

I would like to thank Department of Science and Technology (DST) Major Research Project (Ref no. SR/S1/IC-36/2012), New Delhi, and Council for Scientific and Industrial Research (CSIR), New Delhi for the financial support in form of research fellowship.

My sincere thanks to **Prof. Anjali Patel**, Head, and Prof. N. D. Kulkarni, Former Head, Department of Chemistry, The Maharaja Sayajirao University of Baroda, Vadodara for providing infrastructure facility.

I am grateful to the following persons and institutions for their assistance during the different stages of my research work.

Solution NMR and BET	FIST - I, DST
FT-IR, TG-DTA and GC-MS	Department of Chemistry, The Maharaja Sayajirao University of Baroda
FT - Raman	Faculty of Science, The Maharaja Sayajirao University of Baroda
Polarimetry studies	Prof. Ashutosh Bedekar, Department of Chemistry, The Maharaja Sayajirao University of Baroda
EDX Analysis	Prof. Vandana Rao, Metallurgy Department, The Maharaja Sayajirao University of Baroda
Powder XRD	CSMCRI, Bhavnagar
Solid state MAS NMR	SAIF, IIT - Bombay and IISc, Bengaluru
ESR and ICP-AES	SAIF, IIT-Bombay
CD Spectroscopy	IIT-Gandhinagar

First of all I would like to thank my beloved Bhagwan, who has been my sole inspiration, and who's many blessings and guidance has made me who I am today. There are several people with whom I am indebted for their contribution in various stages of my work and who made this PhD thesis possible. I am great full to my senior, Dr. Ketan Patel for his suggestions at the early stage of my research. Special mention to my seniors Dr. Soyeb Pathan, Dr. Nilesh Narkhede and Dr. Sukriti Singh for getting me acquainted with the lab culture and being there whenever I needed their help and assistance. My colleagues and best friends, Ms. Priyanka Solanki and Mr. Anish Patel have been my rock solid supports in the lab and always by my side at all times. I thank them with all my heart. My sincere thanks to my juniors Mr. Jay Patel and Ms. Dhruvi Pithadia for providing a jovial environment.

I am also thankful to all non-teaching staff especially Mr. Raval, Mr. Rane and Mrs. Revathi, of Chemistry Department for their assistance throughout my research work.

I am thankful to friends and colleagues of the department Riddhi Gupta, Hiten Raval, Chirag Savani and Khushboo Bhanderi, for their friendly behaviour, help and support. A special thank you to all the teaching staff for their help and guidance during the course of my research work.

My most humble salutations to the teachers at Sri Sathya Sai Institute of Higher Learning (Brindavan and Prasanthi Nilayam) for preparing me and making me capable of carrying out research as well as for the wonderful lessons of life that I learnt there.

The most important support systems of my life have been my family. It is not easy for a person to stay away from parents. It is even more difficult for parents to stay away from their children. No amount of words would suffice to thank Amma and Appa for letting me follow my dream, yet always being there and having my back throughout. Thank you my dearmost brother Jayesh for

continuously encouraging me and pushing me to go on. Loads of love to my mad family, the Gangans and the Venkys for their constant support and words of wisdom throughout my research tenure. Also, to those who accepted me and made me a part of their family here in Vadodara, your words of encouragement have kept me going through the ups and downs of my stay in here.
