
General Introduction	1-55
Part A: Copper substituted Phosphotungstate	57-135
Chapter 1 - Mono-copper substituted phosphotungstate:	59-97
Synthesis, Characterization, Catalytic Evaluation and Kinetics	
Experimental	65
➤ Materials	
➤ One-pot synthesis of mono-copper substituted phosphotungstate	
➤ Microwave synthesis of mono-copper substituted phosphotungstate	
➤ Catalytic Evaluation	
Results and Discussion	67-94
Catalyst Characterization	67-73
➤ Elemental Analysis	
➤ Thermal Analysis	
➤ Fourier Transform Infrared Spectroscopy	
➤ ³¹ P NMR studies	
➤ UV-Visible Spectrophotometry	
➤ Electron Spin Resonance Spectroscopy	
➤ Powder X-ray Diffraction	
➤ Cyclic Voltammetry	
PW₁₁Cu as catalyst for oxidation of alkenes	74-94
➤ Oxidation of Styrene	
➤ Oxidation of Cis-cyclooctene	
➤ Chemical Kinetics	
➤ Mechanistic Investigation	
➤ Comparison of substrates	
Conclusion	95
References	96-97

Chapter 2 - Di-copper substituted phosphotungstate: Synthesis, Characterization, Catalytic Evaluation and Kinetics	99-135
Experimental	104
➤ Materials	
➤ One-pot synthesis of mono-copper substituted phosphotungstate	
➤ Microwave synthesis of mono-copper substituted phosphotungstate	
➤ Catalytic Evaluation	
Results and Discussion	105-131
Catalyst Characterization	105-112
➤ Elemental Analysis	
➤ Thermal Analysis	
➤ Fourier Transform Infrared Spectroscopy	
➤ ³¹ P NMR studies	
➤ UV-Visible Spectrophotometry	
➤ Electron Spin Resonance Spectroscopy	
➤ Powder X-ray Diffraction	
➤ Cyclic Voltammetry	
PW₁₀Cu₂ as catalyst for oxidation of alkenes	113-131
➤ Oxidation of Styrene	
➤ Oxidation of Cis-cyclooctene	
➤ Chemical Kinetics	
➤ Mechanistic Investigation	
➤ Comparison of substrates	
Conclusion	132
Comparison of mono- and di-substituted catalysts - effect of Cu(II) centre	133-134
References	135

Part B: Supported mono-copper substituted Phosphotungstate	137-197
Chapter 3A - Mono-copper substituted phosphotungstate	139-170
supported on Hydrous Zirconia: Synthesis,	
Characterization, Catalytic Evaluation and Kinetics	
Experimental	144
➤ Materials	
➤ Synthesis of zirconia	
➤ Synthesis of mono-copper substituted	
phosphotungstate	
➤ Synthesis of mono-copper substituted	
phosphotungstate supported on zirconia	
➤ Acidity determination	
➤ Catalytic Evaluation	
Results and Discussion	145-167
Catalyst Characterization	145-154
➤ Leaching test	
➤ Acidity determination and effect of % loading	
➤ Thermal Analysis	
➤ Fourier Transform Infrared Spectroscopy	
➤ Fourier Transform Raman Spectroscopy	
➤ Electron Spin Resonance Spectroscopy	
➤ H ₂ -Temperature Programmed Reduction	
➤ ³¹ P MAS NMR studies	
➤ Powder X-ray Diffraction	
➤ BET Isotherms	
PW₁₁Cu/ZrO₂ as catalyst for oxidation of alkenes	155-167
➤ Oxidation of Styrene	
➤ Oxidation of Cis-cyclooctene	
➤ Chemical Kinetics	
➤ Mechanistic Investigation	
➤ Comparison of substrates	
Summary	168

References	169-170
Chapter 3B - Mono-copper substituted phosphotungstate supported on Neutral Alumina: Synthesis, Characterization, Catalytic Evaluation and Kinetics	171-197
Experimental	174
➤ Materials	
➤ Synthesis of mono-copper substituted phosphotungstate	
➤ Synthesis of mono-copper substituted phosphotungstate supported on alumina	
➤ Acidity determination	
➤ Catalytic Evaluation	
Results and Discussion	175-193
Catalyst Characterization	175-182
➤ Leaching test	
➤ Acidity determination and effect of % loading	
➤ Thermal Analysis	
➤ Fourier Transform Infrared Spectroscopy	
➤ Fourier Transform Raman Spectroscopy	
➤ Electron Spin Resonance Spectroscopy	
➤ H ₂ -Temperature Programmed Reduction	
➤ ³¹ P MAS NMR studies	
➤ Powder X-ray Diffraction	
➤ BET Isotherms	
PW₁₁Cu/Al₂O₃ as catalyst for oxidation of alkenes	183-193
➤ Oxidation of Styrene	
➤ Oxidation of Cis-cyclooctene	
➤ Chemical Kinetics	
➤ Mechanistic Investigation	
Summary	194
Comparison of PW₁₁Cu/ZrO₂ and PW₁₁Cu/Al₂O₃ - effect of support	195

References	196
Conclusion	197
Part C: Inorganic-organic hybrid materials based on Copper substituted Phosphotungstate	199-248
Chapter 4A - Imidazole functionalized mono-copper substituted phosphotungstate: Synthesis, Characterization, Catalytic Evaluation and Kinetics	201-229
Experimental	207-208
➤ Materials	
➤ Synthesis of mono-copper substituted phosphotungstate	
➤ Functionalization of $PW_{11}Cu$	
➤ Catalytic evaluation	
Results and Discussion	208-227
Catalyst Characterization	208-214
➤ Leaching test	
➤ Effect of % loading	
➤ Thermal Analysis	
➤ Fourier Transform Infrared Spectroscopy	
➤ UV-Visible Spectroscopy	
➤ ^{31}P NMR studies	
➤ 1H NMR Studies	
➤ Powder X-ray Diffraction	
➤ Cyclic Voltammetry	
$PW_{11}Cu$-Im as catalyst for oxidation of alkenes	215-227
➤ Oxidation of Styrene	
➤ Oxidation of cis-cyclooctene	
➤ Chemical Kinetics	
➤ Mechanistic Investigation	
➤ Comparison of substrates	
Summary	228
References	229

Chapter 4B - (S)-1-Phenylethylamine functionalized mono-	231-248
copper substituted phosphotungstate: Synthesis,	
Characterization and Catalytic Evaluation	
Experimental	235-236
➤ Materials	
➤ Synthesis of mono-copper substituted phosphotungstate	
➤ Functionalization of PW ₁₁ Cu	
➤ Catalytic Evaluation	
Results and Discussion	236-244
Catalyst Characterization	236-241
➤ Thermal Analysis	
➤ Fourier Transform Infrared Spectroscopy	
➤ ¹³ C MAS NMR Studies	
➤ Electron Spin Resonance Spectroscopy	
➤ Powder X-ray Diffraction	
➤ Optical Rotation	
Asymmetric oxidation of styrene	242-244
Summary	245
References	246-247
Conclusion	248
Main Conclusions	249
Novelty of work	250
Published papers	251
Papers presented & Seminars attended	252
