Chapter1	Introduction	1-24
	1.1 <i>Chirality</i>	1
	1.2 <i>Helicity</i>	1
	1.3 <i>Historical background</i>	2
	1.4 <i>Structure and properties</i>	4
	1.5 <i>Consequence of helicity</i>	4
	1.6 <i>Types of helical molecules</i>	7
	1.7 <i>Chemistry of helical molecules</i>	9
	1.8 <i>Aza Helicenes</i>	14
	1.9 <i>Carbazole derived aza helicenes</i>	16
	1.10 <i>Aim of the thesis</i>	17
	1.11 <i>References</i>	20
Chapter 2	Synthesis and Study of aza[7], aza[9] and Functionalized aza[n] helicenes with one nitrogen atom	25-145
	2.1 <i>Photocyclization</i>	25
	2.2 <i>Regioselectivity of photocyclization</i>	26
	2.3 <i>Synthesis and Study of mono aza[7]helicene</i>	32
	2. 4 <i>Results and discussion</i>	38-45
	2.4.1 <i>Synthesis of aza[7]helicenes</i>	38
	2.4.2 <i>Regioselectivity of aza[7]helicene</i>	41
	2.4.3 <i>X-Ray Structure analysis</i>	41
	2.4.4 <i>Photophysical properties</i>	43
	2.4.5 <i>Thermal properties</i>	44
	2.5 <i>Synthesis and study of aza[9]helicene</i>	46
	2.6 <i>Results and discussion</i>	46-57
	2.6.1 <i>Synthesis of aza[9]helicene</i>	46
	2.6.2 <i>Regioselectivity of aza[9]helicene</i>	47
	2.6.3 <i>Characterization of regiomers</i>	49
	2.6.4 <i>X-Ray structure analysis</i>	51

2.6.5	<i>Effect of concentration on regiomer formation</i>	53
2.6.6	<i>Optical properties</i>	56
2.7	<i>Synthesis and study of functionalized mono aza[n]helicenes</i>	58
2.8	<i>Post Functionalization or transformation of helical skeleton</i>	58
2.9	<i>Results and discussion</i>	65-77
2.9.1	<i>Synthesis of cyano aza[n]helicenes</i>	65
2.9.2	<i>Functional group transformation of cyano aza[6]helicene</i>	71
2.9.3	<i>Functionalization of cyano aza[6]helicene via electrophilic aromatic substitution and post functionalization</i>	73
2.9.4	<i>Attempted enzymatic resolution</i>	74
2.9.5	<i>Synthesis and Resolution of aza[6]helicene based amine ligands</i>	75
2.10	<i>Synthesis of dicyano aza[9]helicene</i>	77
2.11	<i>Conclusion</i>	78
2.12	<i>Experimental procedures</i>	79
2.13	<i>Spectral data</i>	107
2.14	<i>References</i>	141
Chapter 3	Synthesis and Study of aza[n]helicenes with more than one nitrogen atom	146-239
3.1	<i>Introduction: Synthesis and properties of bis aza[n]helicenes</i>	146
3.2	<i>Properties of inserting multiple N atoms in helical framework</i>	149
3.3	<i>Synthesis and Study of bis aza[5] and bis aza[6]helicenes</i>	153
3.4	RESULTS AND DISCUSSION	156-163
3.4.1	<i>Synthesis</i>	156

3.4.2	<i>X-Ray structure</i>	158
3.4.3	<i>Photophysical properties</i>	161
3.5	<i>Introduction: Synthesis and Study of bis carbazole based aza helicenes</i>	164
3.6	<i>Synthesis and Study of bis carbazole based aza helicenes</i>	165-185
3.6.1	<i>Synthesis</i>	165
3.7	<i>Conclusion</i>	185
3.8	<i>Experimental procedures</i>	186
3.9	<i>Spectral data</i>	211
3.10	<i>References</i>	237
Chapter 4	Spontaneous Resolution of dicyano aza[7]helicenes	240-290
4.1	<i>Spontaneous Resolution through Supramolecular self-assembly</i>	240
4.2	<i>Designing molecules for Spontaneous Resolution</i>	241
4.3	<i>Detection of Conglomerates</i>	241
4.4	<i>Spontaneous resolution of helical molecules</i>	242
4.5	<i>Spontaneous Resolution of helicenes on surfaces</i>	243
4.6	<i>Cyano helicenes and conglomerate formation</i>	244
4.7	<i>Results and Discussion</i>	245-255
4.7.1	<i>Synthesis of Cyano aza[7]helicenes</i>	245
4.7.2	<i>Crystal Structure, supramolecular superhelix and spontaneous resolution</i>	246
4.8	<i>Attempts towards the peripheral modification of cyano aza[7]helicenes</i>	255
4.9	<i>Conclusion</i>	258
4.10	<i>Few prominent interactions</i>	260
4.11	<i>X-Ray crystal data</i>	263
4.12	<i>Experimental procedures</i>	265

4.13 <i>Spectral data</i>	274
4.14 <i>References</i>	288
