

ACKNOWLEDGEMENT

The realization of this work was only possible due to the several people's collaboration, to which desire to express my gratefulness.

First and foremost I offer my sincerest gratitude to my research supervisor, Professor (Dr.) Prasanna S. Ghalsasi, Department of Chemistry, The Maharaja Sayajirao University of Baroda who supported me throughout my research with his knowledge whilst allowing me the room to work in my own way. He with his extensive knowledge of molecular materials through numerous discussions significantly altered many of the arguments put forth in the thesis. He taught me to read, think and helped a lot in developing the reasoning skills. I attribute the thesis to his encouragement and effort and without him this thesis would not have seen its final form.

I am thankful to Professor (Dr.) N. D. Kulkarni, Head, Department of Chemistry, The Maharaja Sayajirao University of Baroda and Professor (Dr.) B. V. Kamath, former Head for the support and encouragement in various departmental activities.
