

LIST OF TABLES

Table No.		Page No.
Chapter 1: Introduction of Molecular Materials		
1.1	Difference between molecular materials and conventional materials	3
1.2	Examples of conventional inorganic network and molecule-based functionally active materials	5
1.3	Representative commercially used Molecule Based Materials (MBMs)	5
Chapter 2: Molecular Magnetic Materials		
2.1	Crystallographic data and structure refinements for compounds 1, 2, 3, 4 and 5	27
Chapter 3: Molecular Ferroelectric Materials		
3.1	88 possible ferroelectric phase transitions with Aizu notation	44
3.2	Wave-numbers (cm^{-1}) of the bands observed in the powder FT-IR spectra of all compounds	54-56
3.3	Relative intensities of the bands observed in the powder Raman spectra of 1a, 2a and 3a	59-60
3.4	Chemical shifts of ^1H NMR spectra of compounds 1a, 1b, 2a, 2b, 3a, 3b, 4b and 5b	62
3.5	DSC chart of compounds 1a, 1b, 2a, 2b, 3a, 3b, 4b and 5b at different temperatures	72

Designing and Studies on Molecular Materials

3.6	Crystal structure and refinement parameters for 1b , 2b , 3b-M , 3b-P , 4b and 5b	78
3.7	Crystal structure and refinement parameters for 1a and 3a	79
3.8	Crystal structure and refinement parameters for 3b-HT	98
3.9	Selected bond lengths (Å) for compounds 1a , 1b , 2b , 3a , 3b-M and 3b-P	103
3.10	Selected bond angles (°) for compounds 1a , 1b , 2b , 3a , 3b-M and 3b-P	103
3.11	Hydrogen-bonding geometries (Å; °) for sugar/needle like compounds 1b , 2b , 3b-M and 3b-P	104
3.12	Hydrogen-bonding geometries (Å; °) for sugar/needle like compounds 1a and 3a	104

Chapter 4: Molecular Nonporous compounds for adsorption-desorption

4.1	X-ray crystal data of B₁	128
4.2	Bond lengths of A₁ and B₁	129
4.3	Planes {h k l} passing through different 2θ values in A₁	132
4.4	Crystallographic data and structure refinements for B_R and B_S at RT	143
4.5	Bond lengths of A_R , A_S , B_R and A_S	144
4.6	SOR data on A_R and A_S , B_R and B_S in methanol at 30 °C	150
4.7	<i>ex-situ</i> reaction monitoring with time of conversion of A_S to B_S using SOR in methanol and S1(τ) showed SOR of conversion of B_S → A_S at 30 °C	150

Designing and Studies on Molecular Materials

4.8	DSC chart of compound B₁ , B_R and B_S at different temperatures	157
-----	--	-----

Chapter 5: Racemic Resolution in Molecular Materials

5.1	Crystal structure and refinement parameters for 1R , 1S , 2 and 3R	187
5.2	Selected bond lengths, bond angles and hydrogen bonds for 1R , 1S , 2 and 3R	195
5.3	Crystal structure and refinement parameters for compounds 3 , 4 , 5 , 6 and 7	206
5.4	Selected bond length of compounds 3/4 and 5 .	208
5.5	Selected bond angles of compounds 3/4 and 5	209

Chapter 6: Molecular Thermochromic Materials

6.1	DSC chart of compound 3 , 3LT and 4 at different temperatures.	232
6.2	Crystallographic data and structure refinements for compounds 3 and 4 at RT; at HT (3HT , 4HT) and at LT (3LT)	235
6.3	Selected bond lengths, bond angles and hydrogen bonds for 3 , 3HT , 3LT , 4 and 4HT	243

Designing and Studies on Molecular Materials

6.4	Interatomic distances (\AA) of ligand hydrochlorides for 3 , 3HT , 3LT , 4 and 4HT compounds.	244
-----	---	-----

Chapter 7: Molecular Dual Fluorescent Materials

7.1	Percentage yield of Thiocyanato aniline and Derivative	263
7.2	Details of ^1H NMR spectra of compounds 1 , 2 , 3 and 4	267
7.3	Crystallographic data and structure refinements for compounds 1 , 3 and 4 at RT	274
7.4	All bond lengths and bond angles data at Ground State Structure of compounds 1 , 3 and 4 from X-ray Crystal Analysis.	276
7.5	Absorption spectra values of λ_{max} of compounds 1 , 2 , 3 and 4 in different solvents	277
7.6	Emission spectra values of compounds 1 , 2 , 3 and 4 in different solvents	278
7.7	Percentage yield of HNO_3 / HCl salts of 4-thiocyanato aniline.	287
7.8	Details of ^1H NMR spectra for compounds 5 and 6	290
7.9	Crystallographic data and structure refinements for compounds 1 , 3 and 4 at RT	293

Designing and Studies on Molecular Materials

7.10	All bond lengths and bond angles data at Ground State Structure of compounds 1 , 5 and 6 from X-ray Crystal Analysis	295
7.11	Hydrogen bonds [\AA and $^\circ$]	296
7.12	Absorption spectra values of λ_{max} of compounds 5 and 6 in acetonitrile solvent	297

Chapter 8: Interaction of Molecular Nanoparticles and CdS nanoparticles

8.1	FT-IR modes of compounds 1 and Zn-1	311
8.2	^1H NMR data of compounds 1 and Zn-1	313
8.3	Soret and Q-Bands in compound 1 and Zn-1	314
8.4	Emission bands of 1 and Zn-1	316
8.5	Study with different Stabilizers and particle size of compound 1NP , Zn-1NP , 3NP , 1NC and Zn-1NC	322
8.6	Shift in Soret and Q-Bands of Nanocomposite	324
8.7	Photo physical properties of 1 such as excited state energy (E_s), ground (E_s/s^+) and excited state oxidation potential (E_{s^*/s^+})	329

Annexure III: Synthesis of strong electron acceptor compounds

III.1	Wave-numbers (cm^{-1}) of the bands observed in the powder FT-IR spectra of compound 1 and 2	353
-------	---	-----
