

ACKNOWLEDGEMENTS

Working on my Ph.D. has been a wonderful and a memorable experience. It is hard to say whether it has been grappling with the topic itself which has been the real learning experience, or learning how to write papers and proposals, work in a group, and stay focused. Completing a Ph.D. is truly a marathon event, and I would not have been able to complete this journey without the aid and support of countless people.

I must first express my deepest sense of gratitude and everlasting respect to my research advisor, **Dr. Vinay Kumar Singh**, Assistant Professor, Department of Chemistry, Faculty of Science, The Maharaja Sayajirao University of Baroda, Vadodara-390002 India, for his invaluable guidance, fruitful discussions, strictly scientific attitude and humane understanding throughout the research. He encouraged me to never accept anything short of my personal best in my research. He has been a steady influence throughout my Ph.D. career; he has oriented and supported me with promptness and care, and has always been patient and encouraging in times of new ideas and difficulties; he has listened to my ideas and discussions which frequently led to key insights. His ability to select and to approach compelling research problems, high scientific standards, and hard work set an example. I admire his ability to balance research interests and personal pursuits. I thank him for his guidance, strong support and the chance he gave me to work as a research student under his supervision.

I am heartily thankful to **Prof. N. D. Kulkarni**, Head, Department of chemistry and former Head, **Prof. B. V. Kamath**, Department of Chemistry, Faculty of Science, The M. S. University of Baroda, for providing facilities available in department. I would like to thank Dean, Department of Chemistry, Faculty of Science, The Maharaja Sayajirao University of Baroda, Vadodara-390002 India, for providing the facilities for research.

The financial support obtained in the form of JRF in the CSIR project New Delhi and University Grants Commission (BSR-UGC-RFSMS), New Delhi and The Maharaja Sayajirao University of Baroda, Vadodara is gratefully acknowledged. I would like to thank Dr. Rajkishor Rai, Medicinal Chemistry Division, IIM CSIR Jammu, India for MALDI- TOF MS analysis, Dr. Mobin M. Shaikh from IIT Indore for X-Ray Crystallographic analysis and SAIF Mumbai for EPR analysis.

It gives me immense pleasure to acknowledge the help, co-operation, continuous support, suggestions, encouragement and involvement rendered by my

group colleagues Mr. Rahul Kadu, Mrs. Vineeta Pillai and Mr. Amrit V during my Ph. D. work. In addition, I have been very privileged to get to know Dr. Ashok Vishwakarma, Dr. Deepak Singh, Mr. Sanjay Yadav and Mahesh Sindore who became my best companions during this course of time in Baroda; they supported and helped me a lot in many ways, so I am very much thankful to them.

One cannot forget the strength and support that one gets from their family. I feel a tremendous paucity of words to explicate my fortuity for unconditional love, sacrifices, invigorating inspiration and earnest care provided by my father, Shri Lal Bachan Verma and mother Smt. Keshpati Devi; throughout the period of toil, turmoil and tribulations. I am enormously privileged to have parents who have given their all and are as invested in my educational achievements as I am. They have been instrumental in my journey from infancy, and I know this is as much a victory for them as it is for me. I feel extremely proud to have achieved our dream.

There are no suitable words to convey my regards to my sisters Mrs. Kalpana, Mrs. Anjali and Ms. Anuradha and younger brother Mr. Alok Patel for their encouragement, support and incessant help at the time of need. I also need to thank Brother-in-law, Mr. Awadhesh and Ajay Patel for their selfless affection, support, forever implicit and heartfelt well wishes and blessings. I also acknowledge and admire my nephew Sachin and niece Parul for their affection, without whose love the present endeavor would have remained an unrealized dream.

I am very much thankful to Mr. Rajesh Bajpai, Mrs. Sudha Bajpai, Mr. Suyash Bajpai for giving me a moral support throughout this work. I am very much thankful to my friends Ms. Archana Rao and Mr. Tahir Zafar for giving me a moral support throughout this work.

I am deeply grateful to colleagues Ms. Ankita, Ms. Ishani Sahay, Mrs. Ruchita Takore, Mrs. Ramadevi Pullipaka, Mr. Dushyant Reddy, Hemant Mande, Neelesh Jain, Mehul, Shardul, Umesh Chaudhari, Harish, Kushan, Dr. Sanjay Parihar and all other colleagues for their generous help, cooperation and moral support.

Last but not the least, I pay my sincere thanks to all those who were directly or indirectly involved in the completion of this work.

Thank you so much,

Mr. Sanjay Kumar Verma
