Chapter 1	Introduction: Metal Directed Self-assembly of Dithiocarbamate and Xanthate Ligands	
	Abstract	
1.1.	Self-assembly	2
1.2.	1,1-Dithio Ligands	6
1.2.1.	Dithiocarbamate	7
1.2.2.	Dithiolate (Xanthate)	7
1.2.3.	Classification of dtc/xan self-assembled complexes	9
1.2.4.	Applications	13
1.3.	Objectives	18
1.4.	General Instrumentation and Methods	19
1.5.	References	20
Chapter 2	Metallamacrocyclic Xanthate Complexes of Co^{II}/ Cu^{II} Derived From Xanthates of Phenolates and Their Use in (2:2) Binuclear N, O-Schiff Base Macrocyclic Formation: Synthesis, Characterization and <i>in vitro</i> Cytotoxicity Studies	
	Abstract	27
2.1.	Introduction	28
2.2.	Experimental Section	30
2.2.1.	Instrumentations	30
2.2.2.	Ligand precursors L ¹ and L ²	30
2.2.3.	General procedure for synthesis of K ₂ xan ¹ and K ₂ xan ²	30
2.2.4.	General procedure for synthesis of 1-4	31
2.2.5.	General procedure for synthesis of 5-8	31
2.2.6.	Fluorescence study in the presence of metal ions	34
2.2.7.	X-ray structure determinations	34
2.2.8.	In vitro cytotoxic study	34
2.2.8.1.	MTT assay for cell viability/ proliferation	34

2.2.8.2.	Annexin V/PI Double Staining for Cell Death Analysis	35
2.3.	Results and discussion	35
2.3.1.	Synthesis and characterization	35
2.3.2.	Metal ion sensing	41
2.3.3.	Thermogravimetric Analysis	43
2.3.4.	Crystallographic Study	44
2.3.5.	Theoretical Investigations	51
2.3.6.	In vitro cytotoxic activity	58
2.3.7.	Induction of apoptosis in human cancer HEP 3B and IMR 32 cells	62
2.4.	Conclusion	65
2.5.	References	65
2.6.	Annexure	74
Chapter 3	Binuclear Xanthate Macrocyclic Complexes of Co^{II}, Ni^{II}, Cu^{II} and Zn^{II} Derived from <i>N</i>-Substituted Diethanol Amine, CS₂ and M(OAc)₂: Synthesis, Characterization, DFT study and <i>in vitro</i> Cytotoxic Activity	
	Abstract	88
3.1.	Introduction	89
3.2.	Experimental Section	90
3.2.1.	Synthesis of <i>N</i> -substituted diethanol amine precursors L ¹ -L ²	90
3.2.2.	<i>In vitro</i> cytotoxic study	92
3.3.	Results and Discussion	93
3.3.1.	Synthesis and Characterization	93
3.3.2.	UV-visible absorption and Emission Property	96
3.3.3.	Thermochromic behavior of binuclear Ni ^{II} xanthate complex 2	98
3.3.4.	Thermogravimetric Study	101
3.3.5.	Structural Details	102
3.3.6.	Computational Investigations	109
3.3.7.	<i>In vitro</i> Cytotoxicity	116
3.4.	Conclusion	120

	3.5. References	121
	3.6. Annexure	125
Chapter 4	Diphenyltin^{IV}dithiocarbamate Macrocylic Complexes Derived from 4,4'-Bis(2-(alkylamino)acetamido)diphenyl ether, CS₂ and Ph₂SnCl₂: Synthesis, Characterization, DFT study and <i>in vitro</i> Apoptosis Inducing-Cytotoxic Activity	
	Abstract	135
	4.1. Introduction	136
	4.2. Experimental Section	138
	4.2.1. Synthesis of 4,4'-bis(2-chloroacetamido)diphenyl ether (L')	138
	4.2.2. General synthetic procedure for of secondary diamine precursors (L ¹ -L ⁶)	139
	4.2.3. Synthesis of binuclear diphenyltin ^{IV} dithiocarbamate macrocyclic complexes 1-6	140
	4.2.4. <i>In vitro</i> cytotoxicity study	145
	4.3. Results and Discussion	145
	4.3.1. Syntheses and Characterization	145
	4.3.2. Computational Investigations	148
	4.3.3. <i>In vitro</i> cytotoxic activity	152
	4.4. Conclusion	159
	4.5. References	159
	4.6. Annexure	165
Chapter 5A	4,4'-Bis(arylideneamino)diphenyl ether Derivatives and Their Reduced Benzyl Forms: A Study on Crystal Packing Patterns and <i>in vitro</i> Cytotoxicity	
	Abstract	182
	5A.1. Introduction	183
	5A.2. Experimental Section	185
	5A.2.1. General procedure for synthesis of bisimines 1-6	185
	5A.2.2. General procedure for synthesis of diamines 7 and 10	185
	5A.3. Results and discussion	192
	5A.3.1. Synthesis and characterization	192
	5A.3.2. Thermogravimetric studies for 1-10	194

5A.3.3.	Effect of substituents on crystal packing patterns	196
5A.3.4.	Biological importance: In vitro cytotoxic activity	209
5A.4.	Conclusion	214
5A.5.	References	215
5A.6.	Annexure	218
Chapter 5B	Binuclear Dithiocarbamate Macrocyclic Complexes of Ni^{II}, Zn^{II} and Cd^{II} Derived From 4,4'-Bis(arylmethylamino) diphenyl ether, CS₂ and M(OAc)₂: Synthesis, Characterization, DFT study and in vitro Cytotoxicity	
	Abstract	232
5B.1.	Introduction	233
5B.2.	Experimental Section	234
5B.2.1.	Synthesis of binuclear M ^{II} dithiocarbamate macrocyclic complexes 1-6	234
5B.2.2.	Host-Guest Reactivity Study (Jobs Plot)	237
5B.2.3.	<i>In vitro</i> cytotoxic study: MTT assay for cell viability/ proliferation	237
5B.3.	Results and Discussion	237
5B.3.1.	Syntheses and Characterization	237
5B.3.2.	Optical Properties	240
5B.3.3.	Thermogravimetric Studies for 1-6	242
5B.3.4.	Host-Guest Reactivity Study (Jobs Plot)	243
5B.3.5.	Computational Investigations In Vitro Cytotoxic Activity	245
5B.3.6.	In vitro cytotoxic activity	251
5B.4.	Conclusion	254
5B.5.	References	255
5B.6.	Annexure	259
	List of Publications	276
	Papers presented in conferences/symposia	276
