

List of Tables

Figure No.	Table Caption	Page No.
1.1	Comparison between organic electronics and classical electronics	4
2.1	Calculated HOMO-LUMO energies of compounds	45
3.1	Photophysical properties of polymers	93
3.2	Molecular weight and poly-dispersity index (obtained from GPC analysis) and decomposition temperature T_d (obtained from TGA) of synthesized polymers	94
3.3	Electrochemical properties of PTTDCB	95
4.1	Photophysical properties of polymers, PTTPBT and PTPDPBT	128
4.2	Molecular weight and poly-dispersity index (obtained from GPC analysis) and decomposition temperature T_d (obtained from TGA) of synthesized polymers	129
4.3	Electrochemical properties of PTTPBT and PTPDPBT	130
4.4	Photophysical properties of M1	153
4.5	Electrochemical properties of M1	154
5.1	Values of torsion angles and length of short contacts of compound 11b and 11e	204
5.2	Optimized structures of compound 11a , 11c , 11d , 13b and 15	208
5.3	IR spectra values obtained from experimental and DFT calculations	210
