

ACKNOWLEDGMENTS

I would like to extend my heartfelt thanks to many people, who so generously contributed to the work presented in this thesis.

Firstly, special mention goes to my enthusiastic supervisor, Dr. Vinay Kumar Singh for providing me an opportunity to pursue my desire to explore the beauty of chemistry through my Ph.D. I also thank him for all the facilities he has given me for pursuing the same. No words can ever suffice to thank him for what all he has done for me in this course of time. I call him my mentor not just because he has guided me to the completion of my Ph.D., but because he has prepared me towards becoming a good scientist. His constant support and never ending encouragement for me to work on the supramolecular, bioinorganic and coordination chemistry streams has enhanced my understanding of the subject immensely I am particularly indebted to him from the bottom of my heart, for his constant faith in my lab results, and for providing me with fantastic lab training. Not only has he made me efficient in my work he has also taught me to be a better human being. I have learnt from him to be helpful and compassionate to all around us. Under his guidance I realize I gained much beyond a degree. I thank you sir, for all that I am today. Mere words cannot express all the gratitude that fills my heart. Yet, I take this opportunity to thank you sir, thank you for everything.

I would like to thank UGC - New Delhi, for awarding me with the BSR fellowship that have supported me enormously throughout the duration of my course. I am grateful to the UGC - CAS, DST - FIST and DST - PURSE programs through which the essential instrument facilities have been established at the university. I am extremely thankful to the former Head of the department of chemistry Prof. B. V. Kamath and the current Head, Prof. N. D. Kulkarni for providing me with access to the same.

A handful of friends and professors have been instrumental in taking our work to greater heights. In this regard, I would like to thank Dr. Divesh Shrivastav from the CSMCRI, Bhavnagar for carrying out HRMS studies and Dr. S. R. Shah and Dr.

Arpita Desai for the carrying out NMR analysis. I am extremely thankful to my dearest friend Ms. Lipi Buch, Zoology Department, MSU for the biological studies. The results provided by her has surely improved our work immensely.

I am also thankful to all the teaching and non- teaching staff members of the Department of Chemistry and University office for their kind support and guidance. I am grateful to my seniors Dr. Rahul Kadu and Dr. Sanjay Verma for their valuable guidance and prompt help whenever I needed. I am extremely thankful to my group mates Shaily, Komal, Heena, Chirag and lab-mates who have worked with me during the tenure of 2012-2017, for creating a positive environment in our lab. I would like to specially thank my wonderful friends Priyanka Khanvilkar, Priyanka Salunke, Krutika Vasava, Heta Patel and Aditya Puranik for all the light and fun moments. All of them have made my time in M.S University truly unforgettable which I will always cherish for life.

I want to specially thank my dearest friend Nisha Khandarkar for all the support and love. The friendship I share with her can never be put in words. Thank you for being there in all my difficult times.

Finally, and most importantly I want to thank my dearest husband Vijesh for his unending love and support. He is the one person who inspires me every single day. I want to thank my parents for being my strongest support system and making me capable of who I am today. I am blessed to have the most amazing in-laws who believed in me and motivated me to pursue my dreams, I am extremely thankful to them for their love and support. I also want to thank my son Shriansh for being the reason of my happiness. All of them are my world and the reason for my motivation.

Vineeta Vijesh Pillai
