

CONTENTS

Chapter 1 Introduction _____

11

1.1 Background and Literature Review _____ **12**

1.1.1 Controlled drug delivery: use of polymers _____ 13

1.1.2 Polyurethane chemistry: A brief overview _____ 21

1.1.3 Polyurethanes: biocompatibility and drug delivery applications _____ 30

1.2 Thesis aim and hypothesis _____ **42**

1.3 References _____ **44**

Chapter 2 Structure-property relationships and biocompatibility of carbohydrate crosslinked polyurethanes _____

57

2.1. Introduction _____ **58**

2.2 Materials and methods _____ **59**

2.2.1 Raw materials _____ 59

2.2.2 Synthesis of PUs _____ 59

2.2.3 Characterization _____ 61

2.3 Results and discussion _____ **64**

2.3.1 Mechanical Properties _____ 64

2.3.2 Morphology _____ 69

2.3.3 Thermal analysis _____ 70

2.3.4 Sorption studies _____ 73

2.3.5 Biodegradation Study _____ 78

2.3.6 MTT assay _____ 80

2.4 Conclusions _____ **80**

2.5 References _____ **82**

Chapter 3 Stoichiometry of PUs – A commanding factor on the rate of drug delivery

87

3.1 Introduction _____ **88**

3.2. Materials and methods _____ **90**

3.2.1 Materials _____ 90

3.2.2 Preparation of Polyurethane films _____	91
3.2.3 Characterization _____	92
3.2.4 Swelling studies _____	94
3.2.5 Drug loading and release from PUs _____	95
3.2.6 Drug stability studies _____	96
3.2.7 Cell culture and measurement of cell viability by MTT assay _____	97

3.3 Results and discussion _____ 97

3.3.1 Mechanical Properties _____	97
3.3.2 IR spectroscopy _____	98
3.3.3 Morphology _____	101
3.3.4 Thermal analysis _____	105
3.3.5 Swelling studies _____	109
3.3.6 Drug release study _____	109
3.3.7 Stability studies _____	117
3.3.8 Cell viability by MTT assay _____	117

3.4. Conclusions _____ 119

3.5 References _____ 121

Chapter 4 Cellulose crosslinked pH-responsive waterborne polyurethanes for drug

delivery: α -hydroxy acids as drug release modifiers _____

128

4.1 Introduction _____ 129

4.1.1 Waterborne PUs: A brief introduction _____	129
4.1.2 Stimuli-responsive polymers- an overview _____	131
4.1.3 pH responsive polymers _____	133
4.1.4 pH responsive waterborne polyurethanes _____	135

4.2. Materials and methods _____ 138

4.2.1 Materials _____	138
4.2.2 Synthesis of waterborne PU films _____	138
4.2.3 Characterization _____	142
4.2.4 Swelling studies _____	143
4.2.5 Drug loading and release from PUs _____	143
4.2.6 degradation studies _____	145

4.3. Results and discussion _____ 145

4.3.1 Synthesis of waterborne PU films _____	145
4.3.2 Characterization _____	146
4.4. Conclusions _____	161
4.5 References _____	162
Chapter 5 _____	171
<i>β-Cyclodextrin-polyurethane magnetic nanoconjugates for targeted drug delivery in cancer therapy</i> _____	171
5.1. Introduction _____	172
5.2. Materials and methods _____	177
5.2.1 Materials _____	177
5.2.2 Synthesis of PU-MNP nanoconjugates _____	177
5.2.3 Characterization _____	178
5.2.4 Preparation of dacarbazine loaded PU-MNP nanoconjugates _____	179
5.2.5 Swelling studies of PU MNP nanoconjugates _____	180
5.2.6 Cell culture and measurement of cell viability by MTT assay _____	180
5.3. Results and discussion _____	181
5.3.1 Synthesis of PU-MNP nanoconjugates _____	181
5.3.2 IR spectroscopy _____	181
5.3.3 Thermal analysis _____	183
5.3.4 SEM-EDS analysis _____	187
5.3.5 TEM analysis _____	190
5.3.6 VSM analysis _____	191
5.3.7 XRD Analysis _____	195
5.3.8 Swelling studies _____	196
5.3.9 Drug loading and release studies _____	196
5.3.10 MTT Assay _____	202
5.4. Conclusions _____	203
5.5 References _____	205
