

Contents

Chapter 1

Introduction

1.1 Introduction	1
1.2 Synthesis of Nanoparticles	4
1.3 Organometallic Approach	7

Chapter 2:

Synthesis of ZnS Nanoparticles using L-proline as template, Their characterization and Application as asymmetric catalyst in Organic Transformation

2.1 Introduction	17
2.2. Experimental Section	27
2.2.1 Materials	27
2.2.2 Synthesis of ZnS nanoparticles	28
2.2.3 Aldol condensation reaction	29
2.2.4 Characterization of synthesized nanoparticles and Aldol products.	32
2.3. Results and Discussion	33

2.3.1 Compositional and morphological studies	33
2.3.2 Immobilization of L-Proline on ZnS nanoparticles	37
2.3.3 Aldol condensation reaction	40
2.3.4 Mechanism Investigation	45
2.4. Conclusion	56
References	58

Chapter 3

Synthesis of ZnO Nanoparticles Using Glycine As Template, Their Characterization and Application As Support for Lipase Enzyme Immobilization in Esterification Reaction

3.1 Introduction	65
3.2 Experimental Section	75
3.2.1 Materials	75
3.2.2 Synthesis of ZnO nanoparticles	75
3.2.3 Lipase Immobilization	77
3.2.4 Protein Estimation	78
3.2.5 Enzyme Assay	78
3.2.6 Operational Stability of immobilized lipase	80
3.2.6.1 Effects of pH on enzyme activity	80

3.2.6.2 Effect of Temperature on enzyme activity	80
3.2.6.3 Thermal stability of immobilized enzyme	80
3.2.7 Esterification reaction	81
3.2.8 Characterization of synthesized nanoparticles and esterification	
Products	81
3.3 Results and discussion	83
3.3.1 Compositional and Morphological studies	83
3.3.2 Optical studies	87
3.3.3 Surface charges	89
3.3.4 FTIR Study	90
3.3.5 Operational stability of lipase enzyme	93
3.3.5.1 Effect of pH.	93
3.3.5.2 Effect of temperature	95
3.3.5.3 Thermal stability	96
3.4 Esterification Reaction	100
3.5 Leaching study	102
3.6 Conclusion	103
References	

Chapter 4

Synthesis of ZnS Nanoparticles using *thiol* as Template, Their characterization and Application as Photocatalyst

4.1 Introduction	115
4.2 Experimental Section	122
4.2.1 Material	122
4.2.2 Method	122
4.2.3 Characterization	124
4.3 Results and discussion	126
4.4 Photocatalytic performance of pristine ZnS and Ni doped ZnS NPs.	132
4.5 Mechanism of photocatalytic activity	136
4.6 Conclusion	146
References	148

Chapter 5

Synthesis of Fe₃O₄ Nanoparticles using *edta* as Template, Their characterization and Applications as Vectors for Drug Delivery and MRI Contrast Agent

5.1 Introduction	156
5.2 Experimental Section	166

5.2.1 Materials	166
5.2.2 Synthesis of Fe₃O₄/edta NPs	166
5.2.3 Synthesis of imatinib loaded Fe₃O₄/edta/P_{magnetic} micelles	167
5.2.4 Characterization	168
5.2.5 <i>In vitro</i> cytotoxicity and cell culture study	170
5.2.6 <i>In vitro</i> cytotoxicity test	171
5.2.7 <i>In vitro</i> drug release kinetics	172
5.2.8 <i>In-vivo</i> studies	172
5.2.9 Cytotoxicity – Histopathology	173
5.2.10 Animal imaging	174
5.3 Results and discussion	175
5.3.1 Compositional, morphological and surface studies	176
5.3.2 Magnetic study	186
5.3.3 <i>In vitro</i> drug release kinetics, cell viability and cytotoxicity studies	187

5.3.4 MTT Assay	188
5.3.5 <i>In vivo</i> tissue distribution	192
5.5.6 Histopathological analysis	194
5.3.7 Phantom Study	195
5.3.8 <i>In vivo</i> animal imaging	197
5.4 Conclusion	204
References	206

Chapter 6

Synthesis of Fe₃O₄ Nanoparticles using *edta* as Template, Their characterization and Applications as Vectors for Gene Delivery

6.1 Introduction	214
6.2 Experimental	222
6.2.1 Materials	222
6.2.2 Synthesis of Fe ₃ O ₄ / <i>edta</i> NPs	223
6.2.3 Characterization of synthesized Fe ₃ O ₄ / <i>edta</i> NPs.	223
6.3 Isolation, detection and purification pDNA	225

6.3.1 Harvesting the bacterial culture	225
6.3.2 Isolation, detection of plasmid	225
6.3.3 Detection of plasmid DNA on Agarose Gel Electrophoresis	226
6.3.4 Transformation of plasmid DNA	226
in <i>E.coli</i> (Sambrook and Russell, 2001)	
6.4 Formulation of nanoparticle	227
6.5 Transformation of pDNA loaded Fe₃O₄ nanoparticles into <i>E.coliDH5α</i>.	227
6.5.1 Coinoculation of DNA loaded nanoparticles with <i>DH5α</i>	227
6.5.2 Screening of transformants.	227
6.6. Results and Discussion	228
6.6.1 Evaluation of pDNA.	233
6.6.2 Evaluation of plasmid DNA loaded nanoparticles	233
6.7 Conclusion	239
References	240
