

Table of Contents

Chapter No.	Chapter	Page No.
1	Introduction	01
1.1	Introduction	02
1.2	Functional domains of Quinolone pharmacophore	06
1.3	Mechanism of Action	08
1.4	Role of metal ions in quinolone chemistry	09
1.5	Chemical properties of quinolones related to complexation Process	11
1.6	Metals and metal complexes in medicine	13
1.7	DNA interactions of metal complexes	14
1.8	DNA cleavage	23
1.9	Review of Literature	28
2	Material and Methods	39
2.0	Characterization techniques	41
2.1	Infrared spectroscopy	41
2.2	Ultraviolet and visible spectroscopy	41
2.3	Nuclear Magnetic resonance spectroscopy	41
2.4	Electronic spin resonance spectroscopy	42
2.5	Mass spectrometry	42
2.6	Thermal Analysis	42
2.7	Cyclic voltammetry	42
2.8	DNA binding studies	43
2.9	Protein Binding studies	48
2.10	Biological studies	51
2.11	Antiglycation activity	61

3	Quinolones interacting with copper (II), nickel (II), Vanadium (II), Manganese (II) and zinc (II): structural features, biological evaluation and perspectives	65
3.1	3.1 Introduction	66
3.2	3.2 General synthesis of complexes	69
3.3	3.3 Physicochemical data of the synthesized complexes	71
3.4	3.4 Results and discussions	75
3.5	3.5 Conclusion	110
4	Mixed ligand metal complexes of quinolone antibacterials: synthesis, characterization, interaction with DNA and cytotoxicity studies.	115
4.1	Introduction	116
4.2	General synthesis of complexes	119
4.3	Physicochemical data of the synthesized complexes	121
4.4	Results and discussions	125
4.5	Conclusion	145
5	Aminoacid-derivatized Cu (II) complexes: Synthesis, DNA interactions and in vitro Cytotoxicity.	150
5.1	Introduction	151
5.2	General synthesis of complexes	154
5.3	Physicochemical data of the synthesized Ligands & Complexes	157
5.4	Results and discussions	164
5.5	Conclusion	185
6	Mixed Ligand Transition Metal Complexes of Curcumin: Synthesis, DNA Binding and in vitro Antitumor Activity.	189
6.1	Introduction	190
6.2	General synthesis of complexes	193
6.3	Physicochemical data of the synthesized complexes	194
6.4	Results and discussions	195
6.5	Conclusion	206

7	Synthesis and Characterization of Cu (II) Schiff base complexes: Anti-glycation agents.	209
7.1	7.1 Introduction	210
7.2	General synthesis of complexes	214
7.3	Physicochemical data of the synthesized Ligands & Complexes	216
7.4	Results and discussions	218
7.5	Conclusion	231
8	Luminescent Transition Metal Complexes as Optical Sensor for Cu (II) and DNA.	234
8.1	Introduction	235
8.2	General synthesis of complexes	239
8.3	Physicochemical data of Complexes	241
8.4	Results and discussions	244
8.5	Conclusion	260
