

Although writing up the PhD thesis might be the effort of one person, the reason that person even gets as far as starting to write up is thanks to all the people supporting that PhD student. First and foremost, I would like to extend my sincere gratitude to my research guide Prof. (Dr.) Anjali Patel for introducing me to this exciting field of catalysis and for facilitating all the requirements for research, going out of her way. Her advice during my doctoral research endeavours for the past five years has constantly forced me to remain focused on achieving my goal. Her enthusiasm, integral view on research and her mission for providing high-quality work, has made a deep impression on me. Without her guidance and constant feedback this PhD would not have been achievable. She has motivated me to become an independent researcher and helped me realize the power of critical reasoning. Her technical and editorial advice as well as insights on the workings of academic research in general was essential for completion of this thesis work. Her unflinching courage and conviction will always inspire me, and I hope to continue to work with her noble thoughts.

Sukriti R. Singh

I would like to thank Department of Science and Technology (DST) Major Research Project (Ref no. SR/S5/GC-01/2009), New Delhi, for the financial support in form of research fellowship.

My sincere thanks to **Prof. N. D. Kulkarni**, Head, Department of Chemistry, The M. S. University of Baroda and Prof. B. V. Kamath, Former Head, Department of Chemistry, The M. S. University of Baroda, Vadodara for providing infrastructure facility.

I am grateful to the following persons for helping me during the different stages of my research work.

FT-IR, TG-DTA, GC-MS and BET committees	Department of Chemistry, The M. S. University of Baroda
---	---

EDX analysis	Prof. Vandana Rao, Metallurgy Department, The M. S. University of Baroda
--------------	--

XRD and BET Surface Area Measurement	CSMCRI, Bhavnagar
--------------------------------------	-------------------

³¹ P, ²⁹ Si MAS NMR and TEM	IISc, Bangalore and SAIF, IIT Mumbai
---	--------------------------------------

FT-Raman	SAIF, IIT Madras
----------	------------------

SEM and TEM	NEHU, Shillong
-------------	----------------

First of all I would like to thank God, who's many blessings have made me who I am today and being a source of divine light. There are several people with whom I am indebted for their contribution in various stages of my work and who made this Ph. D thesis possible. I am great full to my seniors, Dr. Ketan Patel and Dr. Varsha Brahmkhatri for their co-operative suggestions at the early stage of my research.

My acknowledgement will never be complete without the special mention of my seniors with whom I have spent major time in lab, Dr. Soyeb Pathan and Mr. Nilesh Narkhede. They have taught me the lab culture and I would like to

acknowledge all their support, friendship, assistance and motivation during entire tenure of research. My earnest thanks to my colleagues, Ms. Priyanka Solanki, Mr. Rajesh Sadashivan and Ms. Pravya Prakashan for providing joyful lab environment.

I am also thankful to all non-teaching staff especially Mr. Raval, Mr. Mahesh, Mr. Vasant, and Mr. Dinesh, of Chemistry Department for their assistance throughout my research work.

I am thankful to friends and colleagues of the department Sanjay Yadav, Ishani, Dr. Krupa, Rahul Bhatt, for their friendly behaviour and support. I would not have studied this PhD without the wise counsel of efficient teachers, the guiding lamps, who have been steady hands to steer me through my undergraduate and postgraduate career at The M. S. University of Baroda.

It's my fortune to gratefully acknowledge the support of some special individuals in life. I would also like to say a heartfelt thank you to my Mummy and Papa for always believing in me, encouraging me to follow my dreams and helping me in financial crunch situations. I thank my brother Rohit, Jagriti Didi and Alok Jiju for celebrating my each accomplishment and for helping in whatever way they could during this challenging period. Thank you every one for being with me in ups and downs of life, for withstanding my frustration at times and helping me get through this period in the most positive way. Last but not the least, I would like to thank my best friend Prashant, who in all ways has been by my side since days of graduation, post-graduation and throughout this PhD, encouraging every single minute of it. He has been with me ever since as a friend, a companion and a motivator. A heartfelt thanks to everyone.
