

Index

Certificate	i
Declaration	ii
Preface	iii
Acknowledgements	v
1 Polymorphs, Co-crystals, Salts and their significance	
1.1. Polymorphs	01
1.2. Co-crystals	16
1.3. Salts	21
1.4. Characterization of polymorphs, co-crystals and salts of active pharmaceutical ingredients	28
1.5. Aim of research	29
1.6. Scope of the present work and approaches taken	30
1.7. Details of chapters included in thesis	30
1.8. References	32
2 Novel Forms of a Potent Cannabinoid Receptor Modulator	
2.1 Introduction	40
2.2 Rationale & Development strategy	47
2.3 Chemistry	48
2.4 Results and discussions	52
2.5 Conclusion	54
2.6 Experimental Section	54
2.7 References	66
2.8 Characterization Data	70
3 A Novel p38 MAP kinase inhibitor and its pharmaceutically acceptable salts	
3.1 Introduction	122
3.2 Structure, Function and mechanism of action of p38 Kinases	123
3.3 Chemistry and Rationale	131
3.4 Results and discussion	136
3.5 Conclusion	142
3.6 Experimental Section	142
3.7 References	156
3.8 Characterization Data	162

4	Novel Salts of an Anti-Platelet Agent	
4.1	Introduction	191
4.2	Chemistry & Rationale	194
4.3	Results and discussions	198
4.4	Conclusion	204
4.5	Experimental Section	204
4.6	References	222
4.7	Characterization Data	228
5	Crystal modifications of 1H- [1]Benzoxepino[5,4-c]pyrazole-3-carboxamide, 8-chloro-1-(2,4-dichlorophenyl)-4,5-dihydro-N-1-piperidinyI and (+) (S)-methyl α - 5(4,5,6,7-tetrahydro(3,2-c)thienopyridyl) (2-chlorophenyl)-acetate benzenesulfonate using certain crystal modifiers	
5.1	Introduction	242
5.2	Preparation of co-crystals of compounds (1A) & (1B)	247
5.3	Results and discussions	248
5.4	Conclusion	265
5.5	Experimental section	265
5.6	References	270
6	Publications	274
7	Curriculum Vitae	292
