

## ACKNOWLEDGEMENT

It is with a legitimate sense of fulfillment and a heart full of sincere gratitude to many people that this research thesis is finally submitted for the award of my Ph.D. degree. It has been a long journey which saw many ups and downs, so natural to any research program and I raise my mind and heart in gratitude to God Almighty but for whose caring providence this project would not have been completed.

I place on record my gratitude to Prof. Dr. N. D. Kulkarni, the Head of the Department of Chemistry, the M. S. University of Baroda, Gujarat, India, for her immense support and encouragement to me during my Ph. D. program. I also recall the former Head of the Department, Prof. Dr. B. V. Kamath who heartily welcomed me to the department for this research project. I thank him from the bottom of my heart.

It has been really an intellectual pleasure, privilege and honor to have the opportunity to work under the guidance of Dr. Rajendrasinh N. Jadeja, who has been my research supervisor. My thanks for him know no bounds for accepting my candidature for Ph. D. and also for introducing me to the new area of Schiff base Coordination Chemistry. His insistence for precision and his love for perfection have been my guiding lights all through this research endeavor.

I am greatly indebted to Mrs. Dr. Bhavana Trivedi, Professor, Department of Chemistry, The M. S. university of Baroda for her valuable suggestions and encouragement in the initial stage of my research. I take this opportunity to thank all the professors of the Department of Chemistry of the M. S. University of Baroda for all encouragement and support all through this work. The kind and timely services of the non-teaching staff of the laboratory are hereby gratefully acknowledged.

Very unforgettable indeed is my warm association with my senior research colleagues Dr. Komal Vyas, Dr. Sanjay Parihar and Mr Kiran Nakum whose presence was always heartwarming and very helpful in solving the day-to-day hurdles of research. My many thanks to them. I also thank all my fellow researchers in the Department of Chemistry for their friendship and support.

Dr Jignesh H. Pandya, who was Assistant Professor in Christ College when I started my research, has been a constant companion for me from the beginning to the very end supporting me all through, though he was transferred meanwhile to D.K.V. College, Jamnagar. But for his commitment and interest in research this project could

not have been completed. Words are insufficient to thank him for his support during this work.

Dr. John J. George, Assistant Professor, Christ College, Rajkot, has been kind enough to work out the *In Silico* studies of the compounds synthesized to predict their biological functions. I whole-heartily thank him for helping me conduct this Bio-Cheminformatics study of the novel compounds synthesized in the course of research.

The service of the Microbiology Department of the Christ College, Rajkot, is gratefully acknowledged for conducting the study on the microbial activity of various compounds prepared as part of this research.

I am also thankful to Mr. Ashish Radadiya, Research Scholar NFDD, Surashtra University, Rajkot, for Molecular Dynamics study of the synthesized compounds.

Prof. Vivek K. Gupta of Jammu University has been very helpful and supportive in undertaking the X-ray crystallographic studies included in my research work. His kind service is gratefully acknowledged.

My special thanks to Dr. Komal Vyas, my senior research colleague who helped me conduct the DNA binding studies with the support of the Biochemistry Department of the M. S. University of Baroda. My thanks to the Department of Biochemistry as well.

Above all else, my thanks are due to the Rajkot Kelvani Samaj, the owner of Christ College, Rajkot, especially to its President, His Excellency Dr. Jose Chittooparampil, Bishop of Rajkot, for giving me the permission to undertake this research project for my Ph.D. I thank my religious community, the CMI of Xavier's society, Rajkot, for generously financing my research.

Lastly, but not the least, I place on record my sincere gratitude to every person whoever has contributed somehow to the completion of this work. Omission of names, if any, is regretted. It is my fond hope and prayer that every well-wisher and friend of mine associated with this work be abundantly blessed by God, the Almighty.

(Joseph V.A.)
