Chapter-1. A general Introduction to the Thesis	(1-18)
1.1. Schiff bases	2
1.2. Applications of Schiff bases and their metal complexes	4
1.2.1. Applications in the biological systems	5
1.2.1.1. Antibacterial activity	5
1.2.1.2. Antifungal activity	8
1.2.1.3. Antiviral activity	8
1.2.2. Therapeutic applications	8
1.2.3. Industrial applications	9
1.2.4 Agricultural applications	9
1.2.5 Application as catalysts	10
1.2.6 Applications of Schiff base in analytical chemistry	10
1.2.6.1 Photometric method	11
1.2.6.2 Fluorometry	11
1.2.6.3 Potentiometric sensors	11
1.2.6.4 Schiff base as solvent extractant	12
1.2.6.5 Application in HPLC	12
1.3 Objectives and the methodology of the present work	13
1.4 References	14
Chapter-2. Synthesis, Characterization, crystal structure and biological evaluation of ON donor Schiff bases and their metal complexes	19-118
2.1 Synthesis, characterization, crystal structure and the biological evaluation of pyrazolone based Schiff bases and their metal complexes	21-65
2.1.1 Introduction	21
2.1.2 Experimental Section	27
2.1.2.1 Materials	27
2.1.2.2 Single crystal X-ray structure determination	27
2.1.2.3 Antimicrobial screening	28

2.1.3 Preparation of Schiff base ligands and metal complexes	28
2.1.3.1 Synthesis of APTPMP	28
2.1.3.2 Synthesis of APTPMP-4F	29
2.1.3.3. Synthesis of APTPMP-4BR	30
2.1.3.4. Synthesis of APTPMP-2,4ME	31
2.1.3.5. Synthesis of APTPMP-3,4F	31
2.1.3.6. Synthesis of [Cu(APTPMP-4F) ₂]	32
2.1.3.7. Synthesis of [Cu(APTPMP-4BR) ₂]	33
2.1.3.8. Synthesis of [Cu(APTPMP-2,4ME) ₂]	34
2.1.3.9. Synthesis of [Cu(APTPMP-3,4F) ₂]	35
2.1.4. Characterization of Schiff base ligands and metal complexes	36
2.1.4.1. Physico-chemical properties of synthesized Schiff base ligands and metal complexes	36
2.1.4.2. Crystal structure of Schiff base ligands and metal complexes	38
2.1.4.2.1. The Crystal structure of Schiff base ligand APTPMP-2,4ME	38
2.1.4.2.2. Crystal structure of Schiff base metal complex [Cu(APTPMP-2,4ME) ₂] and [Cu(APTPMP-3,4F) ₂]	40
2.1.4.3. IR spectral studies	46
2.1.4.4. ¹ H NMR spectral studies	49
2.1.4.5. Mass spectral studies	50
2.1.4.6. UV – Visible spectral studies	56
2.1.4.7. Conductivity measurement	56
2.1.4.8. Magnetic measurement	56
2.1.5. Antimicrobial activity	57
2.1.6. Conclusion	59
2.1.7. References	59
2.2: Synthesis, characterization, crystal structure and the biological evaluation of o-vanillin-4-aminoantipyrine Schiff base and its metal complexes	66-90
2.2.1 INTRODUCTION	66
2.2.2 EXPERIMENTAL SECTION	68
2.2.2.1 Materials	68

2.2.2.2 Single crystal X-ray structure determination	69
2.2.2.3 Antimicrobial screening	69
2.2.3 Preparation of Schiff base ligands and metal complexes	69
2.2.3.1 Synthesis of V-4AAP	69
2.2.3.2 Synthesis of [Cu(V-4AAP) ₂]	70
2.2.3.3 Synthesis of [Ni(V-4AAP) ₂]	71
2.2.3.4 Synthesis of [OV(V-4AAP) ₂]	72
2.2.4 Characterization of Schiff base ligands and metal complexes	73
2.2.4.1 Physico-chemical properties of synthesized Schiff base ligand and metal complexes	73
2.2.4.2 Crystal structure of V-4AAP	74
2.2.4.3 IR spectral studies	77
2.2.4.4 ¹ H NMR spectral studies	80
2.2.4.5 Mass spectral studies	81
2.2.4.6 Thermal studies	85
2.2.4.7 UV – Visible Spectral studies	85
2.2.4.8 Conductivity measurement	86
2.2.5 Antimicrobial activity	86
2.2.6 Conclusion	88
2.2.7 References	88
2.3: Synthesis, characterization and the biological evaluation of o-Vanillin Schiff bases and their metal complexes	91-118
2.3.1 INTRODUCTION	91
2.3.2 EXPERIMENTAL SECTION	94
2.3.2.1 Materials	94
2.3.2.2 Antimicrobial screening	94
2.3.3 Preparation of Schiff base ligands and metal complexes	95
2.3.3.1 Synthesis of V-2,4ME	95
2.3.3.2 Synthesis of V-2N4A	96
2.3.3.3 Synthesis of V-4F	96
2.3.3.4 Synthesis of V-4BR	97
2.3.3.5 Synthesis of [Cu(V-2,4ME) ₂].2H ₂ O	97
2.3.3.6 Synthesis of [Ni(V-2,4ME) ₂].2H ₂ O	98

2.3.3.7 Synthesis of [Cu(V-2N4A) ₂].2H ₂ O	99
2.3.3.8 Synthesis of [Ni(V-2N4A) ₂].2H ₂ O	100
2.3.3.9 Synthesis of [Cu(V-4F) ₂].2H ₂ O	101
2.3.3.10 Synthesis of [Ni(V-4F) ₂].2H ₂ O	102
2.3.3.11 Synthesis of [Cu(V-4BR) ₂].2H ₂ O	103
2.3.3.12 Synthesis of [Ni(V-4BR) ₂].2H ₂ O	103
2.3.4 Characterization of Schiff base ligands and metal complexes	104
2.3.4.1 Physico-chemical properties of the synthesized Schiff base ligand and metal complexes	104
2.3.4.2 IR spectral studies	105
2.3.4.3 NMR spectral studies	107
2.3.4.4 Mass spectral studies	109
2.3.4.5 Thermal studies	111
2.3.4.6 UV – Visible Spectral studies	114
2.3.4.7 Conductivity	115
2.3.5 Antimicrobial activity	115
2.3.6 Conclusion	117
2.3.7 References	117
Chapter-3: Synthesis, Characterization, crystal structure and DNA binding behavior of ONO donor Schiff bases and their metal complexes	119-155
3.1 INTRODUCTION	120
3.2 EXPERIMENTAL SECTION	124
3.2.1 Materials	124
3.2.2 Single crystal X-ray structure determination	125
3.2.3 DNA Binding Experiments	126
3.3 Preparation of Schiff base ligands and metal complexes	127
3.3.1 Synthesis of PMP-EA	127
3.3.2 Synthesis of MCPMP-EA	127
3.3.3 Synthesis of PTPMP-EA	128
3.3.4 Synthesis of [Cu(PMP-EA)(H ₂ O) ₂]	129
3.3.5 Synthesis of [Cu(MCPMP-EA)(H ₂ O) ₂]	130
3.3.6 Synthesis of [Cu(PTPMP-EA)(H ₂ O) ₂]	131

3.4 Characterization of Schiff base ligands and metal complexes	132
3.4.1 Physico-chemical properties of synthesized Schiff base ligands and metal complexes	132
3.4.2 Crystal structure of Schiff base ligand	133
3.4.2.1. The Crystal structure of Schiff base ligand MCPMP-EA	133
3.4.3 IR spectral studies	134
3.4.4 NMR spectral studies	138
3.4.5 Mass spectral studies	140
3.4.6 Thermal studies	142
3.4.7 UV – Visible Spectral studies	144
3.4.8 ESR spectral study	145
3.5 DNA binding studies	147
3.5.1 Absorption spectral studies	147
3.5.2 Competitive DNA-binding studies with EB	148
3.5.3 Viscosity studies	149
3.6 Conclusion	152
3.7 References	152
Chapter-4: Synthesis, characterization, crystal structure and biological evaluation of ONN donor Schiff bases and their metal complexes	156-183
4. Synthesis, characterization, crystal structure and biological evaluation of Schiff bases and metal complexes derived from o-vanillin & Heterocyclic amines	157
4.1 INTRODUCTION	157
4.2 EXPERIMENTAL SECTION	159
4.2.1 Materials	159
4.2.2 Single crystal X-ray structure determination	159
4.2.3 Antibacterial screening	160
4.3 Preparation of Schiff base ligands and metal complexes	160
4.3.1 Synthesis of MMM	160
4.3.2 Synthesis of BMM	161
4.3.3 Synthesis of [Cu(MMM)·NO ₃]·H ₂ O	161
4.3.4 Synthesis of [Ni(MMM)·NO ₃]·H ₂ O	162

4.3.5 Synthesis of [Cu(BMM)·NO ₃]·H ₂ O	162
4.3.6 Synthesis of [Ni(BMM)·NO ₃]·H ₂ O	163
4.4 Characterization of Schiff base ligands and metal complexes	164
4.4.1 Physico-chemical properties of synthesized Schiff base ligands and metal complexes	164
4.4.2 Crystal structure of Schiff base ligands	165
4.4.2.1 The Crystal structure of Schiff base ligand MMM	165
4.4.3 IR spectral studies	167
4.4.4 NMR spectral studies	169
4.4.5 Mass spectral studies	170
4.4.6 Thermal studies	174
4.4.7 UV – Visible Spectral studies	177
4.4.8. Conductivity	177
4.4.9. Magnetic measurement	177
4.5 Antimicrobial activity	178
4.6 Conclusion	179
4.7 References	179
CHAPETR-5. <i>In silico</i> multi-target fishing and docking and molecular dynamics simulation studies of acyl and aldehyde pyrazolones, o- vanillin and some of their novel Schiff bases	184-236
5. <i>In silico</i> multi-target fishing and docking and molecular dynamics simulation studies of acyl and aldehyde pyrazolones, o- vanillin and some of their novel Schiff bases	185
5.1 INTRODUCTION	185
5.2 MATERIALS AND METHODS	186
5.2.1 Ligand Preparation	188
5.2.2 Drug likeliness property prediction	188
5.2.3 Toxicity Prediction	188
5.2.4 Biological function prediction	188
5.2.5 Protein structure retrieval	190
5.2.6 Approved drugs and Inhibitor retrieval	190
5.2.7 Protein-Ligand Docking and Visualization of results	191
5.2.8 Molecular dynamics simulation studies	191

5.3 RESULTS AND DISCUSSIONS	192
5.3.1 Ligand Preparation, Drug likeliness and Toxicity Prediction	192
5.3.2 Biological function prediction	192
5.3.3 Protein structure retrieval, Protein-Ligand Docking and Visualization	196
5.3.4 Molecular dynamics simulation studies	217
5.4 CONCLUSION	231
5.5 References	232
