

Acknowledgement

Completion of this research work was possible with the support of several people. I would like to express my sincere gratitude to all of them. First of all, I am extremely grateful to my research guide, Prof. Ashutosh V. Bedekar, Professor, Department of Chemistry, Faculty of Science for his valuable guidance, scholarly inputs and consistent encouragement I received throughout the research work. I know him from the days of my graduation and I consider it as a great opportunity to do my Ph.D. work under his guidance. He has been actively interested in my work and has always been available to advise me. I am very grateful for his motivation, enthusiasm, and immense knowledge that make him a great mentor. He is a person with a positive outlook, which has always uplifted my interest to do new things in research. Also his patience, flexibility and genuine concerns have made the tenure of six years as research student comfortable and pleasant experience. I am also thankful to Professor (Dr.) B. V. Kamath, former Head, Department of Chemistry for his support during initial phase of my research work. Actually, I began my research work under his guidance with involvement of Bedekar Sir, and shifted guide ship on the superannuation of Prof Kamath.

I am thankful to Professor (Dr.) N. D. Kulkarni, Head, Department of Chemistry, for allowing me to use the infrastructural facilities and motivation during my research work.

The financial support obtained in the form of a fellowship from the University Grant Commission (UGC) and Council of Scientific and Industrial Research (CSIR) New Delhi is gratefully acknowledged.

I am also thankful to the faculties of our department, Prof. S. R. Shah, Prof. P. Padmaja, Prof. P.S. Ghalsasi, Prof. Bhavna Trivedi, Dr. Arun L. Patel, Dr. Hemant P. Soni, Dr. V.K. Singh and other members of teaching staff for their valuable guidance whenever needed. I thank Prof. A. K. Prajapati for helping us in interpreting the analysis of liquid crystals.

I would like to thank Dr Satish Ogale and Dr Prakash P. Wadgaonkar of National Chemical Laboratory (NCL), Pune for cyclic voltammetric analysis, Prof. Sandeep Kumar of Raman Research Institute, Bangalore for DSC analysis and SAIF, Chandigarh, for recording $^1\text{H-NMR}$.

I would like to extend my sincere acknowledgment to the office staff of chemistry department, especially K. J. Rane, Revathi Ganesh, Bhavsar bhai and Kalpeshbhai. I convey special acknowledgement for their help in regards to all official activities related directly or indirectly to my work. Amongst the non-teaching staff members I would like to thank Late. Nagakar dada, Kirtiben, Makwanabhai, Deepak bhai, Raju bhai, Ninad bhai, Mahesh bhai, Lokhande bhai, Vasant bhai, Dinesh bhai, Rathawa bhai, Dhiru bhai and all others for extending basic help for my research.

I am deeply grateful to my lab colleagues Dr. Harish R. Talele, Dr. Akeel Saiyed, Dr. Anju Chaudhary, Mr. Nilesh Jain, Mr. M. Shyam Sundar, Mr. Aditya Khanvilkar, Ms. Riddhi Gupta, Mr. Gourav Upadhyay, Ms. Blessy Rajan and Mr. Hiten Rawal for making the Lab-01 the best place to work at. I also thank Ms. Priyal Pandya and Ms. Priyanka for their association with me during their dissertation. I thank all of them for their help, co-operation, fruitful discussions and friendly association during my Ph.D. work.

I would like to thank my department friends and colleagues Shardul, Priyanka, Harsha, Namrata, Ruchita, Heta, Rinky, Ankita, Harnish, Kushan, Aditya and all other research students of the department for their generous help and cooperation. It needs a special mention for my friends Ramadevi, Ishani, Vishwanath and Indravadan for their constant source of inspiration, moral support and for everything they did for me, I sincerely thank all of them.

Most importantly, none of this would have been possible without the love and patience of my family. I express my special gratitude to my parents Smt. Bharati N. Patel and Shri. Navin H. Patel, who always believed in me and guided me. I thank them for inculcating the values of education which, I think, makes me a better person and a better researcher. I thank my sisters, Meghal and Ratna, for always being beside me with their care and concern and for being my strength all these years. I also thank my niece Nandini and my nephew Dev for spreading happiness and liveliness in my life. I specially thank my husband Bhavin for his kind support, encouragement and all the help for making this thesis as it is today. I would also thank all my in-laws for their concern and support. I warmly appreciate the generosity and understanding of my family.

Above all, I owe it all to Almighty God for granting me the wisdom, health and strength to undertake this research task and enabling me to its completion.

Ms. Krupa N. Patel
