Chapter 1

Synthesis, characterization and catalytic activities of vanadium complexes of acylpyrazolones & their structural analogues (1-13)

1.	Introduction	1
1.1.	Introduction and brief history of pyrazolone	1
1.2.	Vanadium (Introduction and Background)	3
1.3.	Vanadium complexes of pyrazolone	5
2.	Objective and methodology of the present work	10
3.	References	11

Chapter 1-Part 1

Homogeneous catalysis using oxovanadium(IV) complexes (14-52)

1.1.1.	Introduction	14
1.1.2.	Experimental section	16
1.1.2.1.	Materials and physical measurements	16
1.1.2.2.	Synthesis of 4-acylpyrazolone ligands	17
1.1.2.3.	Synthesis of oxovanadium(IV) complexes of 4-acylpyrazolone ligands	19
1.1.2.4.	Crystallography	20
1.1.2.5.	Catalytic reaction	21
1.1.3.	Results and discussion	22
1.1.3.1.	Synthesis and characterization of 4-acylpyrazolone ligands (1-6)	22
1.1.3.2.	Synthesis and characterization of oxovanadium(IV) complexes	26
1.1.3.3.	Catalytic activity studies	40
1.1.4.	Conclusions	49
1.1.5.	References	50

Chapter 1-Part 2

Heterogeneous catalysis using oxovanadium(IV) complexes (53-74)

1.2.1.	Introduction	53
1.2.2.	Experimental	56
1.2.2.1.	Materials and physical measurements	56
1.2.2.2.	Synthesis of oxovanadium(IV) complex $[\text{VO}(\text{L}^1)_2]$	57
1.2.2.3.	Synthesis of support, hydrous zirconia (ZrO_2)	57
1.2.2.4.	Synthesis of Catalyst, Supporting $\text{VO}(\text{L}^1)_2$ onto ZrO_2	57
1.2.2.5.	Catalytic reaction	57
1.2.3.	Results and discussion	57
1.2.3.1.	Synthesis and characterization of the catalyst	57
1.2.3.2.	Oxidation of styrene using hydrogen peroxide	63
1.2.3.3.	Heterogeneity test	68
1.2.3.4.	Recycling of the catalyst	68
1.2.3.5.	Reaction Mechanism	69
1.2.4.	Conclusions	70
1.2.5.	References	71

Chapter 1-Part 3

Homogeneous catalysis using vanadium complexes of tripodal ligands (75-110)

1.3.1.	Introduction	75
1.3.2.	Experimental	79
1.3.2.1.	Materials and physical measurements	79
1.3.2.2.	Synthesis of tripodal ligands	80
1.3.2.3.	Synthesis of V(III) complexes of tripodal ligands	83
1.3.2.4.	Crystallography	83
1.3.2.5.	Catalytic reaction	84
1.3.3.	Results and discussion	85
1.3.3.1.	Synthesis and characterization of tripodal ligands (1-4)	85
1.3.3.2.	Synthesis and characterization of vanadium(III) complexes $[\text{VL}^1]$ and $[\text{VL}^2]$	94
1.3.3.3.	Oxidation of benzyl alcohol	106

1.3.4.	Conclusions	107
1.3.5.	References	108

Chapter 2

Synthesis, characterization and catalytic activities of copper(II) complexes of pyrazolone-based Schiff base ligands (111-148)

2.1.	Introduction	111
2.1.1.	Schiff bases of 4-acylpyrazolones and their metal complex	113
2.1.2.	Objective and methodology for the present work	121
2.2.	Experimental	122
2.2.1.	Materials and physical measurements	122
2.2.2.	Synthesis of 4-acylpyrazolones	122
2.2.3.	Synthesis of Schiff base ligands	124
2.2.4.	Synthesis of Cu(II) complexes	124
2.2.5.	Catalytic reactions	125
2.2.5.1.	Oxidation of benzyl alcohol	125
2.2.5.2.	Oxidation of styrene	125
2.3.	Results and discussion	125
2.3.1.	Crystal structure study	127
2.3.1.1.	Crystal structures of Ligands L ¹ , L ² and L ³	127
2.3.1.2.	Crystal structure of Complex [Cu(L ¹) ₂]	130
2.3.2.	¹ H NMR study of the ligands	134
2.3.3.	FT-IR spectral studies	135
2.3.4.	Mass spectral studies	136
2.3.5.	Electronic spectral studies	137
2.3.6.	EPR spectral studies	138
2.3.7.	Thermogravimetric analysis	140
2.3.8.	Catalytic activity studies	141
2.3.8.1.	Oxidation of benzyl alcohol using Cu(II) complexes	141
2.3.8.2.	Oxidation of styrene using Cu(II) complexes	143
2.4.	Conclusion	144
2.5.	References	144

Chapter 3

Design, synthesis and characterization of rhodamine-pyrazolone based fluorescent molecular sensors (149-185)

3.1.	Introduction	149
3.1.1.	Phenomena of fluorescence	149
3.1.2.	Design of fluorescent molecular sensor	153
3.1.3.	Photophysical mechanisms of fluorescent sensors	153
3.1.3.1.	Photoinduced electron transfer (PET)	153
3.1.3.2.	Energy transfer quenching (ET)	155
3.1.3.3.	Resonance Energy Transfer	156
3.1.3.4.	Photoinduced Charge Transfer (PCT)	158
3.1.3.5.	Twisted Intramolecular Charge Transfer (TICT)	161
3.1.4.	Fluorescent chemosensors based on Rhodamine	162
3.1.5.	Aim and outline of the present work	167
3.2.	Experimental	168
3.2.1.	Materials and physical methods	168
3.2.2.	Synthesis of chemosensors L ¹ and L ²	168
3.2.3.	Ion binding study	169
3.3.	Results and Discussion	171
3.3.1.	Syntheses and characterization	171
3.3.2.	Stoichiometry and binding mode study	176
3.4.	Conclusions	181
3.5.	References	181

Chapter 4

Computational studies on oxovanadium(IV) complexes of acylpyrazolone ligands using DFT method (186-209)

4.1	Introduction	186
4.2	Experimental and computational details	192
4.3	Results and discussion	193
4.3.1.	Molecular geometry	193

4.3.2.	HOMO and LUMO analysis	202
4.3.3.	Electronic density of states analysis	204
4.4.	Conclusions	205
4.5.	References	206
