

## LIST OF TABLES

Table		Page
1.	Result of 421 comparisons between instructional television and conventional teaching	75
2.	Mean and S.D. of scores on intelligence test for three groups of children	132
3.	Analysis of variance of scores on intelligence test for three groups of children	132
4.	Mean scores of criterion variables (language development) before and after treatment, ANACOVA adjusted means and F values for ETV and Non-ETV groups	134
5.	Difference in mean scores on test based on ETV programmes between ETV and Non-ETV groups	136
6.	Mean scores of criterion variables (scholastic achievement) before and after treatment, ANACOVA adjusted means and F values for ETV and Non-ETV groups	137
7.	Mean scores of criterion variables (language development) before and after treatment, ANACOVA adjusted means and F values for ETVI and ETV groups	140
8.	Difference in mean scores on test based on ETV programmes between ETVI and ETV groups	141
9.	Mean scores of criterion variables (scholastic achievement) before and after treatment, ANACOVA adjusted means and F values for ETVI and ETV groups	143

10.	Mean scores of criterion variables (language development) before and after treatment, ANACOVA adjusted means and F values for ETVI and Non-ETV groups	145
11.	Difference in mean score on test based on ETV programme between ETVI and Non-ETV groups	146
12.	Mean scores of criterion variables (scholastic achievement) before and after treatment, ANACOVA adjusted means and F values for ETVI and Non-ETV groups	148
13.	Adjusted mean scores on the criterion variable word meaning after adjustment for the covariate	153
14.	Contrast between adjusted means on the criterion variable post-test score on word meaning after adjusting for the covariate pre-test score on word meaning	153
15.	Adjusted mean scores on the criterion variable verbal fluency after adjustment for the covariate	153
16.	Contrast between adjusted means on the criterion variable post-test score on verbal fluency after adjusting for the covariate pre-test score on verbal fluency	154
17.	Adjusted mean scores on the criterion variable listening comprehension after adjustment for the covariate	154
18.	Contrast between adjusted means on the criterion variable post-test score on listening comprehension after adjusting for the covariate pre-test score on listening comprehension	155
19.	Adjusted mean score on the criterion variable reading comprehension after adjustment for the covariate	155

20.	Contrast between adjusted means on the criterion variable post-test score on reading comprehension after adjusting for the covariate pre-test score on reading comprehension	156
21.	Adjusted mean scores on the criterion variable language development after adjustment for the covariate	156
22.	Contrast between adjusted means on the criterion variable post-test score on language development after adjusting for the covariate pre-test score on language development.	157
23.	Mean scores of children in three groups on test based on ETV programmes after the treatment.	158
24.	Pair-wise comparison of different treatment groups on test based on ETV programmes	158
25.	Adjusted-means on the criterion variable science after adjustment for the covariate	159
26.	Contrast between adjusted means on the criterion variable post-test score on science after adjusting for the covariate pre-test score on science	160
27.	Adjusted-means on the criterion variables social studies after adjustment for the covariate.	160
28.	Contrast between adjusted-means on the criterion variable post-test score on social studies after adjusting for the covariate pre-test score on social studies	161

29. Adjusted means on the criterion variables language achievement after adjustment for the covariate 161
30. Contrast between adjusted means on the criterion variable post-test score on language achievement after adjusting for the covariate pre-test score on language achievement. 162
